Women’s Earnings in New York – 2016

In 2016, New York women who were full-time wage and salary workers had median usual weekly earnings of \$840 or 86.2 percent of the \$975 median usual weekly earnings of their male counterparts, the U.S. Bureau of Labor Statistics reported today. Chief Regional Economist Martin Kohli noted that the 2016 women’s-to-men’s earnings ratio in New York declined 0.7 percentage point from 2015. Nationwide, women earned \$749 per week or 81.9 percent of the \$915 median for men. (See [table 1](#). Earnings in this report do not control for many factors that can be significant in explaining earnings differences.)

In New York, the ratio of women’s to men’s earnings ranged from a low of 78.5 percent in 2000 to a high of 86.9 percent in 2015. (See [chart 1](#). Data for the states began in 1997.)

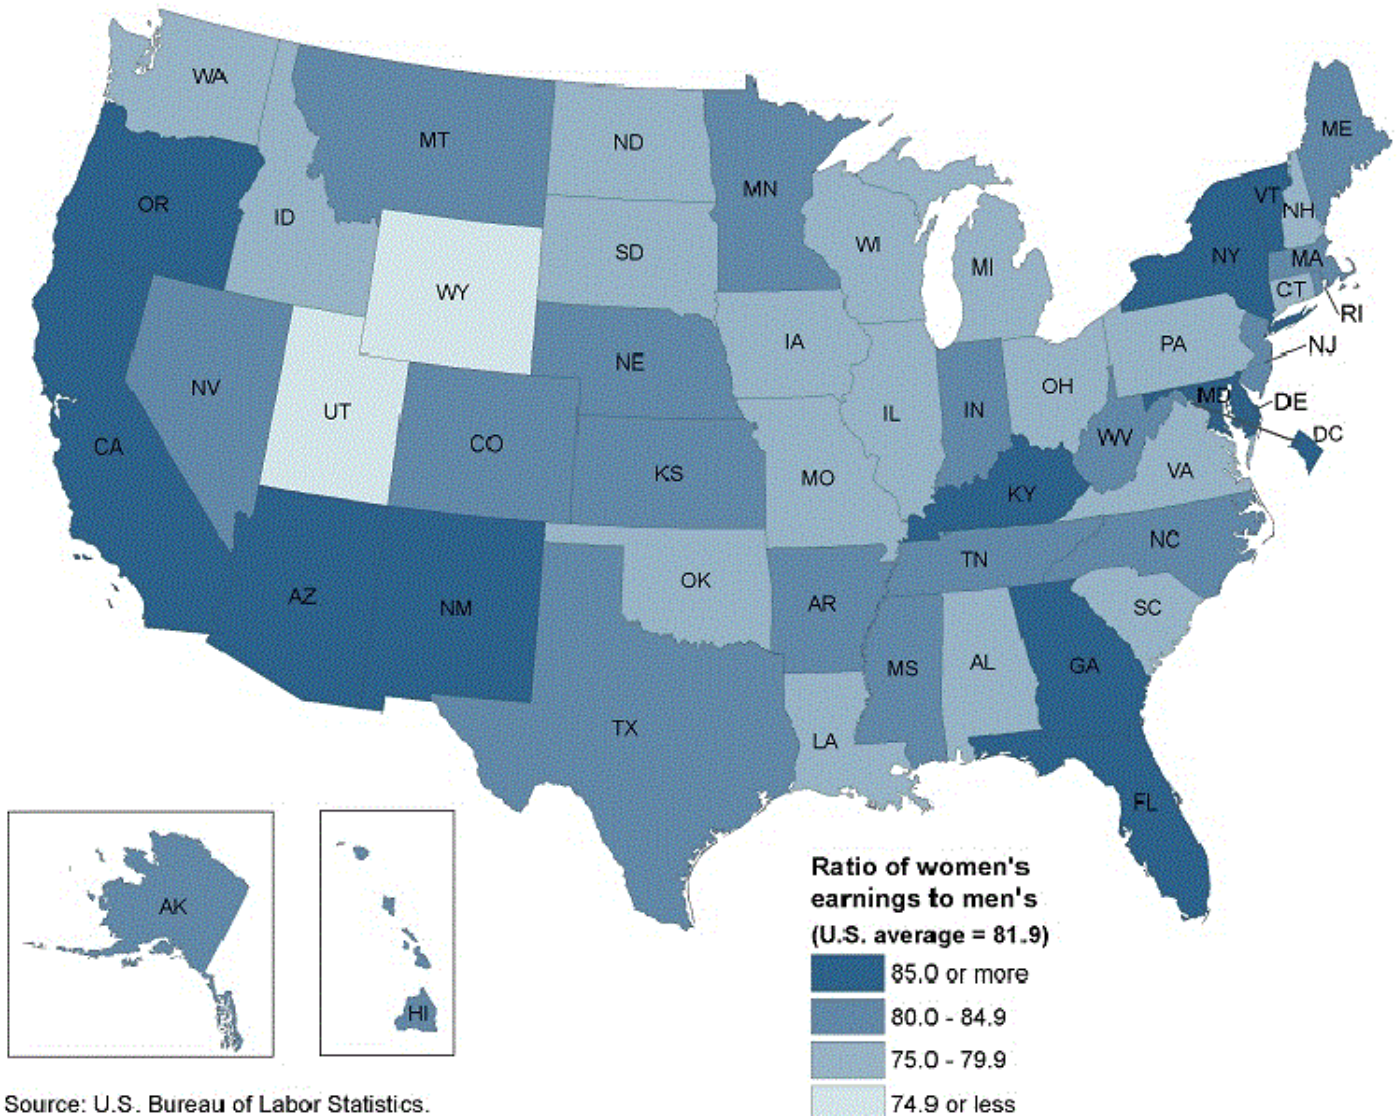

Chart 1. Women’s earnings as a percentage of men’s, full-time wage and salary workers, the United States and New York, 1997–2016 annual averages

Source: U.S. Bureau of Labor Statistics.

Among the 50 states, median weekly earnings of women in full-time wage and salary positions in 2016 ranged from \$624 in Mississippi to \$932 in Massachusetts. In addition to Massachusetts, women’s earnings in Connecticut, Maryland, and New Jersey were above \$875 per week. In the District of Columbia, women earned a median weekly wage of \$1,117. (See [table 1](#) and [chart 2](#).)

Chart 3. Women's earnings as a percentage of men's, full-time wage and salary workers, by state, 2016 annual averages

Technical Note

The estimates in this release were obtained from the Current Population Survey (CPS), which provides information on the labor force, employment, and unemployment. This survey is conducted monthly for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau, using a scientifically selected national sample of about 60,000 eligible households, representing all 50 states and the District of Columbia. The earnings data are collected from one-fourth of the CPS monthly sample and are limited to wage and salary workers. All self-employed workers, both incorporated and unincorporated, are excluded from the data presented in this report.

Statistics based on the CPS data are subject to both sampling and nonsampling error. Further information about the reliability of data from the CPS is available on the [CPS Technical Documentation](#) page of the BLS website.

The principal concepts and definitions used in connection with the earnings data in this release are described briefly below.

Usual weekly earnings. The data represent earnings before taxes and other deductions and include any overtime pay, commissions, or tips usually received (at the main job in the case of multiple jobholders). Respondents are asked to identify the easiest way for them to report earnings (hourly, weekly, biweekly, twice monthly, monthly, annually, or other) and how much they usually earn in the reported time period. Earnings reported on a basis other than weekly are converted to a weekly equivalent. The term “usual” is determined by each respondent’s own understanding of the term.

Medians of usual weekly earnings. The earnings estimates shown in this release are medians. The median is the midpoint in a given earnings distribution, with half of workers having earnings above the median and the other half having earnings below the median.

Wage and salary workers. These are workers age 16 and older who receive wages, salaries, commissions, tips, payments in kind, or piece rates on their sole or principal job. This group includes employees in both the public and private sectors. All self-employed workers are excluded whether or not their businesses are incorporated.

Full-time worker. People who usually work 35 hours or more per week at their sole or principal job are defined as working full time for the purpose of these estimates.

For more information on the median weekly earnings of women and men, see Bureau of Labor Statistics Report 1069, *Highlights of women’s earnings in 2016*, available at <https://www.bls.gov/opub/reports/womens-earnings/2016/pdf/home.pdf>.

Information in this release will be available to sensory impaired individuals upon request: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Note: See footnotes at end of table.

Note: In general, the sampling error for the state estimates is considerably larger than it is for the national estimates; thus, comparisons of state estimates should be made with caution. Data shown are based on workers' state of residence; workers' reported earnings, however, may or may not be from a job located in the same state.
