### Miami Area Employment-June 2014

Total nonfarm employment for the Miami-Fort Lauderdale-Pompano Beach Metropolitan Statistical Area stood at 2,391,700 in June 2014, an increase of 70,300 from a year ago, the U.S. Bureau of Labor Statistics reported today. Miami's rate of job growth, at 3.0 percent, exceeded the national increase of 1.9 percent from June 2013 to June 2014. Regional Commissioner Janet S. Rankin noted that over-the-year employment gains in the local area extended back to August 2010. (See [chart 1](#) and [table 1](#); the Technical Note at the end of this release contains the metropolitan definitions. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

**Chart 1. Total nonfarm employment, over-the-year net change in the Miami metropolitan area and its divisions, June 2009-June 2014**

Source: U.S. Bureau of Labor Statistics.

#### Metropolitan divisions

The Miami area is made up of three metropolitan divisions—separately identifiable employment centers within the larger metropolitan area. All three divisions gained jobs over the year. Miami-Miami Beach-Kendall, the largest of the three divisions with 45 percent of the area's employment, added 29,600 jobs from

June a year ago. The Fort Lauderdale-Pompano Beach-Deerfield Beach division which accounted for 32 percent of Miami's workforce, added 24,600 jobs. The West Palm Beach-Boca Raton-Boynton Beach division, with 23 percent of the workforce, added 16,100 jobs over the 12-month period.

### **Industry employment**

In the Miami metropolitan area, the trade, transportation, and utilities supersector experienced the largest employment increase, up 15,200 or 2.8 percent from June a year ago. This job growth was concentrated in the Fort Lauderdale and Miami metropolitan divisions. Nationwide, employment in this industry grew 2.3 percent over the 12-month period. (See [chart 2](#) and [table 1](#).)

Professional and business services had the second largest over-the-year increase in jobs locally in June 2014, growing by 14,400 or 3.9 percent. The expansion of professional and business services jobs in June 2014 was spread across the three metropolitan divisions. Nationwide, professional and business services increased 3.5 percent over the year.

Leisure and hospitality added 12,000 jobs in June 2014, an increase of 4.2 percent over the year, with the three metropolitan divisions gaining jobs. Nationally, employment in this industry grew 2.8 percent since June 2013.

Two other supersectors gained at least 7,000 jobs over the year in the local area—construction (9,800) and education and health services (7,100). Both supersectors recorded faster rates of job growth locally than their respective national rates. Four supersectors recorded over-the-year employment gains ranging from 3,900 to 1,600 in June 2014.

**Chart 2. Total nonfarm and supersector employment, over-the-year percent change, United States and the Miami metropolitan area, June 2014**

Source: U.S. Bureau of Labor Statistics.

**Employment in the 12 largest metropolitan areas**

Miami was 1 of the nation’s 12 largest metropolitan statistical areas in June 2014. All 12 areas recorded over-the-year job growth, with 6 of them greater than the national average of 1.9 percent. (See [chart 3](#) and [table 2.](#)) The fastest rate of job growth was in Dallas-Fort Worth-Arlington, up 3.6 percent, followed by Houston-Sugar Land-Baytown, up 3.1 percent. The slowest rate of expansion occurred in Detroit-Warren-Livonia, up 0.3 percent.

New York-Northern New Jersey-Long Island added the largest number of jobs from the previous June, gaining 137,800, followed by Los Angeles-Long Beach-Santa Ana (118,700) and Dallas (112,100). Employment expanded by more than 50,000 in Houston, Miami, San Francisco-Oakland-Fremont, and Atlanta-Sandy Springs-Marietta. Detroit registered the smallest 12-month increase (5,000) during the period.

Professional and business services led employment growth in Atlanta, Chicago-Joliet-Naperville, Dallas, and San Francisco. (See [table 2.](#)) In four other metropolitan areas, education and health services recorded the largest gains—Boston-Cambridge-Quincy, Los Angeles, New York, and Philadelphia-Camden-Wilmington.

Over the year, manufacturing recorded the largest loss of jobs in Chicago, Dallas, Los Angeles, and Washington-Arlington-Alexandria, while government led job losses in three areas.

### Technical Note

This release presents nonfarm payroll employment estimates from the Current Employment Statistics (CES) program. The CES survey is a Federal-State cooperative endeavor between State employment security agencies and the Bureau of Labor Statistics.

**Employment definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12<sup>th</sup> of the month. Persons are counted at their place of work rather than at their places of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2007 version of the North American Industry Classification System (NAICS).

**Method of estimation.** The employment data are estimated using a “link relative” technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for approximately 39 percent of CES published series which have insufficient sample for direct sample-based estimates.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports which are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

**Reliability of the estimates.** The estimates presented in this release are based on sample survey, administrative data, and modeling and, thus are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data are also subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the special estimation processes used. The sums of individual items are not always equal the totals shown in the same tables because of rounding.

**Employment estimates.** Measures of sampling error for state CES data at the supersector level are available online at [www.bls.gov/sae/790stderr.htm](http://www.bls.gov/sae/790stderr.htm). Information on recent benchmark revisions for states is available at [www.bls.gov/sae/](http://www.bls.gov/sae/).

**Additional information.**

More complete information on the technical procedures used to develop these estimates and additional data appear in *Employment and Earnings*, which is available online at [www.bls.gov/opub/ee/home.htm](http://www.bls.gov/opub/ee/home.htm). Industry employment data for states and metropolitan areas from the Current Employment Statistics program are also available in the above mentioned news releases and from the Internet at [www.bls.gov/sae/](http://www.bls.gov/sae/).

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.

**Area definitions.** The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on December 1, 2009. A detailed list of the geographic definitions is available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

**The Miami-Fort Lauderdale-Pompano Beach, Fla., Metropolitan Statistical Area** includes the counties of Broward, Miami-Dade, and Palm Beach in Florida.

**The Fort Lauderdale-Pompano Beach-Deerfield Beach, Fla., Metropolitan Division** includes Broward County in Florida.

**The Miami-Miami Beach-Kendall, Fla., Metropolitan Division** includes Miami-Dade County in Florida.

**The West Palm Beach-Boca Raton-Boynton Beach, Fla., Metropolitan Division** includes Palm Beach County in Florida.
