## **Consumer Price Index, South Region – July 2015**

### **Prices down 0.1 percent over the month and 0.1 percent over the year**

The Consumer Price Index for All Urban Consumers (CPI-U) for the South inched down 0.1 percent in July, the U.S. Bureau of Labor Statistics reported today. The energy index declined by 1.2 percent over the month. The all items less food and energy index inched down 0.1 percent while the food index edged up 0.2 percent over the month. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

Over the last 12 months, the all items CPI-U inched down 0.1 percent, the seventh consecutive month of over-the-year declines for this index. The all items less food and energy index advanced 1.8 percent over the year as several categories within this group recorded increases. (See [chart 1.](#))

**Chart 1. Over-the-year percent change in CPI-U, South region, July 2012–July 2015**

Source: U.S. Bureau of Labor Statistics.

### **Food**

The food index rose 0.2 percent in July. Prices for food away from home edged up 0.2 percent and prices for food at home inched up 0.1 percent over the month.

Since July 2014, the food index advanced 1.8 percent, reflecting price increases for both food away from home and food at home, up 3.1 and 0.9 percent, respectively.

## Energy

The energy index declined 1.2 percent in July led by a 2.5-percent decrease in motor fuel prices. Over the month, prices for utility (piped) gas service rose 1.6 percent and prices for electricity were unchanged.

Over the year, energy prices fell 16.3 percent, reflecting a 25.8-percent drop in motor fuel prices. Electricity prices declined 2.0 percent since July 2014 and utility (piped) gas service prices decreased 13.1 percent.

## All items less food and energy

The all items less food and energy index inched down 0.1 percent in July, as a seasonal decline in apparel prices (-3.1 percent), was largely offset by an increase in prices for shelter (0.3 percent).

Since July 2014, the all items less food and energy index advanced 1.8 percent as several indexes increased, most notably shelter (3.1 percent). Medical care, fueled by increases in both medical care services (1.8 percent) and medical care commodities (3.1 percent), rose 2.1 percent over-the-year. Other indexes with over-the-year increases included other goods and services (1.5 percent), education and communication (0.5 percent), and recreation (0.4 percent). The apparel index declined 1.1 percent since July 2014.

**The Consumer Price Index for August 2015 is scheduled to be released on Wednesday, September 16, 2015.**

## Technical Note

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 89 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 28 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 87 urban areas across the country from about 6,000 housing units and approximately 24,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at [www.bls.gov/cpi](http://www.bls.gov/cpi) and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at [www.bls.gov/opub/hom/homch17\\_a.htm](http://www.bls.gov/opub/hom/homch17_a.htm).

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **NOTE: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.**

The **South region** is comprised of Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Footnotes

(1) This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

(2) Index is on a December 1982=100 base.

(3) Indexes on a December 1997=100 base.

(4) Special index based on a substantially smaller sample.

(5) Indexes on a December 1993=100 base.

- Data not available.

Regions defined as the four Census regions. South includes Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

NOTE: Index applies to a month as a whole, not to any specific date. Data not seasonally adjusted.
