County Employment and Wages in Georgia — Fourth Quarter 2014

Eight of the nine large counties in Georgia reported employment gains from December 2013 to December 2014, the U.S. Bureau of Labor Statistics (BLS) reported today. (Large counties are those with 2013 annual average employment levels of 75,000 or more.) Regional Commissioner Janet S. Rankin noted that Chatham County had the largest increase, up 4.6 percent, followed by the counties of Cobb and Fulton, at 4.1 percent each. (See [table 1](#).)

Nationally, employment advanced 2.2 percent from December 2013 to December 2014 as 319 of the 339 largest U.S. counties registered increases. Weld, Colo., and Midland, Texas had the largest percentage increases, with gains of 8.0 percent each over the year. Atlantic, N.J., had the largest over-the-year percentage decline in employment among the largest counties in the U.S. with a loss of 5.0 percent.

Among the largest counties in Georgia, employment was highest in Fulton County (790,500) in December 2014. Three other counties—Gwinnett, Cobb, and De Kalb—had employment levels exceeding 275,000. Together, Georgia's nine large counties accounted for 55.4 percent of total employment within the state. Nationwide, the 339 largest counties made up 72.1 percent of total U.S. employment.

From the fourth quarter of 2013 to the fourth quarter of 2014, Clayton County recorded the fastest rate of increase in average weekly wages among the 9 large counties in Georgia, registering a gain of 7.6 percent. (See [table 1](#).) Fulton County recorded the highest average weekly wage among these large counties at \$1,338 followed by Cobb County (\$1,081) and DeKalb (\$1,013). Nationally, the average weekly wage increased 3.5 percent over the year to \$1,035.

Employment and wage levels (but not over-the-year changes) are also available for the 150 counties in Georgia with employment levels below 75,000. With the exception of Burke County (\$1,078), wage levels in all of these smaller counties were below the national average in December 2014. (See [table 2](#).)

Large county wage changes

Average weekly wages increased in all of Georgia's large counties from the fourth quarter of 2013 to the fourth quarter of 2014. Clayton County's 7.6-percent wage increase ranked 7th among the nation's 339 large counties and Bibb County's 4.7 percent gain ranked in the top 100 nationwide. Wage increases in the remaining large counties ranged from 3.7 to 1.8 percent. (See [table 1](#).)

Nationally, 332 of the 339 largest counties registered over-the-year wage increases. Benton, Ark., had the largest wage gain, up 9.9 percent from the fourth quarter of 2013. Washington, Pa., was second with a wage increase of 9.2 percent, followed by the counties of Midland, Texas (9.0 percent), Brazoria, Texas (8.9 percent), and Douglas, Colo. (8.8 percent).

Among the largest U.S. counties, seven experienced over-the-year wage decreases in average weekly wages. San Mateo, Calif., had the largest percentage decrease in average weekly wages, with a loss of 20.4 percent. Olmsted, Minn., had the second largest percentage decrease with a loss of 5.5 percent, followed by Morris, N.J. (-2.9 percent); Rockland, N.Y. (-1.3 percent); and Camden, N.J. and Butler, Pa. (-0.8 percent each).

Large county average weekly wages

Average weekly wages in 5 of Georgia's 9 largest counties placed in the top half of the national ranking among the 339 largest counties in the fourth quarter of 2014. The highest-paid counties—Fulton and Cobb—were both above the U.S. average of \$1,035 and ranked in the top 75 nationwide. De Kalb (\$1,013), Gwinnett (\$991), and Clayton (\$977) ranked 116th, 131st, and 142nd, respectively. Average weekly wages in the remaining four large counties placed in the bottom third of the national ranking.

Nationally, 95 large counties registered average weekly wages above the U.S. average of \$1,035 in the fourth quarter of 2014. San Mateo, Calif., held the top position among the highest-paid large counties with an average weekly wage of \$2,166. New York, N.Y., was second at \$2,138, followed by Santa Clara, Calif. (\$2,114), Suffolk Mass. (\$1,856), and San Francisco, Calif. (\$1,850).

Seventy-two percent of the largest U.S. counties (244) reported weekly wages below the national average. Horry County, S.C., reported the lowest wage (\$610), followed by the Texas counties of Cameron (\$621) and Hidalgo (\$641), and the Florida counties of Osceola (\$687) and Lake (\$691).

Average weekly wages in Georgia's smaller counties

With the exception of Burke County (\$1,078), all 150 counties in Georgia with employment below 75,000 had average weekly wages below the national average of \$1,035. Among these smaller counties, Chattahoochee had the second highest average weekly wage at \$1,014, while Echols had the lowest at \$482. (See [table 2.](#))

When all 159 counties in Georgia were considered, 32 reported wages below \$600, 70 reported wages from \$600 to \$699, 31 reported wages from \$700 to \$799, and 26 had wages at or above \$800. (See [chart 1.](#))

Additional statistics and other information

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit www.bls.gov/cew.

Employment and Wages Annual Averages Online features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2013 edition of this publication contains selected data produced by Business Employment Dynamics (BED) on job gains and losses, as well as selected data from the first quarter 2014 version of the national news release. Tables and additional content from *Employment and Wages Online Annual Averages 2013* are now available at www.bls.gov/cew/publications/employment-and-wages-annual-averages/2013/home.htm. The 2014 edition of *Employment and Wages Annual Averages Online* will be available in September 2015.

The County Employment and Wages release for first quarter 2015 is scheduled to be released on Thursday, September 17, 2015.

Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The 9.5 million employer reports cover 139.2 million full- and part-time workers. The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS Web site at www.bls.gov/cew/; however, data in QCEW press releases have been revised and may not match the data contained on the Bureau's Web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Richmond, Ga.	104.1	2.3	130	834	275	1.8	300

Footnotes:

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from quarterly employment and pay data adjusted for noneconomic county reclassifications.

(3) Ranking does not include data for Puerto Rico or the Virgin Islands.

(4) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.
