County Employment and Wages in Kentucky — First Quarter 2021

Employment fell in Kentucky's three largest counties from March 2020 to March 2021, the U.S. Bureau of Labor Statistics reported today. (Large counties are those with annual average employment levels of 75,000 or more in 2020.) Regional Commissioner Janet S. Rankin noted that Fayette County had the largest over-the-year decrease in employment at 3.7 percent. (See [chart 1](#) and [table 1](#).)

Chart 1. Over-the-year percent change in covered employment among the largest counties in Kentucky, March 2021

Source: U.S. Bureau of Labor Statistics.

National employment decreased 4.5 percent over the year, with 324 of the 343 largest U.S. counties reporting declines. Calcasieu, LA, had the largest over-the-year percentage decrease in employment with a loss of 14.9 percent. Utah, UT, experienced the largest over-the-year percentage increase in employment with a gain of 6.1 percent.

Among the three largest counties in Kentucky, employment was highest in Jefferson County (452,000) in March 2021. Within Jefferson County’s private industry, health care and social assistance accounted for the largest employment. Together, the three largest Kentucky counties accounted for 40.0 percent of total employment within the state. Nationwide, the 343 largest counties made up 72.3 percent of total U.S. employment.

Employment and wage levels (but not over-the-year changes) are also available for the 117 counties in Kentucky with employment below 75,000. Wage levels in 116 of the 117 smaller counties were below the national average in the first quarter of 2021. (See [table 2.](#))

Large county wage changes

Among Kentucky’s three largest counties, Jefferson County (+3.4 percent) and Fayette County (+3.0 percent) reported average weekly wage gains from the first quarter of 2020 to the first quarter of 2021. (See [chart 2.](#)) Boone County reported an over-the-year decline in average weekly wages.

Chart 2. Over-the-year percent change in covered average weekly wages among the largest counties in Kentucky, first quarter 2021

Source: U.S. Bureau of Labor Statistics.

Among the 343 largest counties in the United States, 312 had over-the-year wage increases. Nationally, across most industries, increases in average weekly wages reflect substantial employment declines combined with wage increases. The lowest paying industry, leisure and hospitality, had the largest employment loss, which resulted in higher average weekly wages for the industry and the nation. San Francisco, CA, had the largest percentage wage increase (+33.9 percent). Clayton, GA, had the largest over-the-year percentage decrease (-14.2 percent).

Large county average weekly wages

Weekly wages in all of Kentucky's three largest counties were below the national average of \$1,289 in the first quarter of 2021. Average weekly wages in Jefferson County (\$1,215, 113th) ranked in the top third nationwide.

Among the largest U.S. counties, 84 reported average weekly wages above the U.S. average in the first quarter of 2021. New York, NY, had the highest average weekly wage at \$3,967. Average weekly wages were below the national average in the remaining 259 counties. At \$685 a week, Cameron, TX, had the lowest average weekly wage.

Average weekly wages in Kentucky's smaller counties

Among the 117 smaller counties in Kentucky—those with employment below 75,000—Hancock (\$1,332) reported an average weekly wage above the national average of \$1,289. Nicholas County (\$555) reported the lowest average weekly wage in the state.

When all 120 counties in Kentucky were considered, 42 reported average weekly wages of less than \$700, 37 registered wages from \$700 to \$799, 25 had wages from \$800 to \$899, 9 had wages from \$900 to \$999, and 7 had average weekly wages of \$1,000 or higher. (See [chart 3](#).)

Additional statistics and other information

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit www.bls.gov/cew.

Employment and Wages Annual Averages Online features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. This publication is typically published in September of the following year of the reference period or shortly after the QCEW first quarter full data update. The *Employment and Wages Annual Averages Online* is available at www.bls.gov/cew/publications/employment-and-wages-annual-averages/.

The County Employment and Wages release for second quarter 2021 is scheduled to be released on Wednesday, November 17, 2021, at 10:00 a.m. (ET). The County Employment and Wages full data update for second quarter 2021 is scheduled to be released on Wednesday, December 1, 2021, at 10:00 a.m. (ET).

Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS web site at www.bls.gov/cew. However, data in QCEW press releases have been revised and may not match the data contained on the Bureau's web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to individuals with sensory impairments upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
