Technical Note

Employer Costs for Employee Compensation (ECEC) measures the average cost to employers for wages and salaries and benefits per employee hour worked.

Employer Costs for Employee Compensation data in this release cover private industry. Excluded from private industry are the self-employed and farm and private household workers. The cost levels for this quarter were collected from a probability sample of approximately 36,900 occupations selected from a sample of about 8,600 establishments in private industry. The private industry sample is rotated over approximately 5 years, which makes the sample more representative of the economy and reduces respondent burden. Data are collected for the pay period including the 12th day of the survey months of March, June, September, and December.

Employer Costs for Employee Compensation data on total compensation, wages and salaries, and benefits in private industry are produced annually in the March reference period for 15 combined and metropolitan statistical areas (CSA and MSA). Further information about metropolitan area ECEC estimates is available at www.bls.gov/opub/mlr/cwc/bls-introduces-new-employer-costs-for-employee-compensation-data-for-private-industry-workers-in-15-metropolitan-areas.pdf.
