Union Membership in Texas – 2014

In 2014, union members accounted for 4.8 percent of wage and salary workers in Texas, the same as in 2013, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Stanley W. Suchman noted that the union membership rate for the state was at its peak in 1993, when it averaged 7.5 percent, and at its lowest point in 2008 at 4.5 percent. (See [chart 1](#) and [table A](#).) Nationwide, union members accounted for 11.1 percent of employed wage and salary workers in 2014, down 0.2 percentage point from 2013. Since 1989, when comparable state data became available, Texas union membership rates have been below the U.S. average.

Chart 1. Members of unions as a percent of employed in the United States and Texas, 2004-2014

Source: U.S. Bureau of Labor Statistics.

Texas had 543,000 union members in 2014. In addition to these members, another 157,000 wage and salary workers in Texas were represented by a union on their main job or covered by an employee association or contract while not being union members themselves. (See [table A](#).) Nationwide, 14.6 million wage and salary workers were union members in 2014 and 1.6 million wage and salary workers were not affiliated with a union but had jobs covered by a union contract.

Table A. Union affiliation of employed wage and salary workers in Texas, annual averages, 2004-2014 (numbers in thousands)

Year	Total employed	Members of unions ⁽¹⁾		Represented by unions ⁽²⁾	
		Total	Percent of employed	Total	Percent of employed
2004	9,072	457	5.0	573	6.3
2005	9,485	506	5.3	590	6.2
2006	9,751	476	4.9	576	5.9
2007	9,899	463	4.7	566	5.7
2008	9,991	449	4.5	559	5.6
2009	9,920	508	5.1	615	6.2
2010	10,025	545	5.4	677	6.7
2011	10,214	534	5.2	643	6.3
2012	10,590	599	5.7	721	6.8
2013	10,877	518	4.8	647	6.0
2014	11,205	543	4.8	700	6.2

Footnotes

(1) Data refer to members of a labor union or an employee association similar to a union.

(2) Data refer to members of a labor union or an employee association similar to a union, as well as workers who report no union affiliation but whose jobs are covered by a union or an employee association contract.

Note: Data refer to the sole or principal job of full- and part-time wage and salary workers. All self-employed workers are excluded, both those with incorporated businesses as well as those with unincorporated businesses. Updated population controls are introduced annually with the release of January data.

In 2014, 19 states had union membership rates above the U.S. average, of which 9 had rates above 15.0 percent. (See [table 1.](#)) Of the nine states with the highest rates, five bordered the Pacific Ocean, three were located in the Northeast, and the remaining state was in the Midwest. (See [chart 2.](#)) New York had the highest rate at 24.6 percent, followed by Alaska (22.8 percent) and Hawaii (21.8 percent). New York has had the highest union membership rate in the nation for 18 of the past 20 years. One state, Vermont, had a union membership rate that matched the U.S. average.

Thirty states and the District of Columbia had union membership rates below the national average of 11.1 percent in 2014. Nine states had union membership rates below 5.0 percent. Among these nine states, seven were located in the South, one was in the Midwest, and one was in the West. North Carolina had the lowest rate at 1.9 percent. The next lowest rates were in South Carolina (2.2 percent) and Mississippi and Utah (3.7 percent each). Union membership rates declined over the year in 27 states and the District of Columbia, rose in 18 states, and were unchanged in 5 states.

State union membership levels depend on both the employment level and the union membership rate. The largest numbers of union members lived in California (2.5 million) and New York (2.0 million). Over half of the 14.6 million union members in the U.S. lived in just seven states (California, 2.5 million; New York, 2.0 million; Illinois, 0.8 million; Pennsylvania, 0.7 million; and Michigan, New Jersey, and Ohio, 0.6 million each), though these states accounted for only about one-third of wage and salary employment nationally.

Technical Note

Statistics based on the CPS are subject to both sampling and nonsampling error. When a sample, rather than the entire population, is surveyed, there is a chance that the sample estimates may differ from the true population values they represent. The exact difference, or sampling error, varies depending upon the particular sample selected, and this variability is measured by the standard error of the estimate. There is about a 90-percent chance, or level of confidence, that an estimate based on a sample will differ by no more than 1.6 standard errors from the true population value because of sampling error. BLS analyses are generally

conducted at the 90-percent level of confidence. The state discussion in this release preserves the longtime practice of highlighting the direction of the movements in state union membership rates and levels regardless of their statistical significance.

The CPS data also are affected by nonsampling error. Nonsampling error can occur for many reasons, including the failure to sample a segment of the population, inability to obtain information for all respondents in the sample, inability or unwillingness of respondents to provide correct information, and errors made in the collection or processing of the data.

Information about the reliability of data from the CPS and guidance on estimating standard errors is available at www.bls.gov/cps/documentation.htm#reliability.

Definitions

The principal definitions used in this release are described briefly below.

Union members. Data refer to members of a labor union or an employee association similar to a union.

Union membership rate. Data refer to the proportion of total wage and salary workers who are union members.

Represented by unions. Data refer to both union members and workers who report no union affiliation but whose jobs are covered by a union or an employee association contract.

Wage and salary workers. Workers who receive wages, salaries, commissions, tips, payment in kind, or piece rates. The group includes employees in both the private and public sectors. Union membership and earnings data exclude all self-employed workers, both those with incorporated businesses as well as those with unincorporated businesses.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200, Federal Relay Service: 800-877-8339.

Table 1. Union affiliation of employed wage and salary workers by state, 2013-2014 annual averages (numbers in thousands)
