County Employment and Wages in Texas – Third Quarter 2016

Employment rose in 19 of the 26 largest counties in Texas from September 2015 to September 2016, the U.S. Bureau of Labor Statistics reported today. (Large counties are defined as those with employment of 75,000 or more as measured by 2015 annual average employment.) Assistant Commissioner for Regional Operations Stanley W. Suchman noted that two Texas counties ranked among the top 20 nationwide for job growth. The employment gains in Galveston and Williamson Counties, at 4.1 percent each, were the fastest in the state and ranked 18th nationwide. In contrast, employment fell in five of the state's largest counties. (See [table 1](#).)

Nationwide, employment advanced 1.7 percent from September 2015 to September 2016 as 307 of the 344 largest U.S. counties registered increases. York, S.C., recorded the fastest employment gain in the country, up 6.0 percent. Midland, Texas, experienced the largest over-the-year percentage decrease in employment with a loss of 5.8 percent; employment in Midland's trade, transportation, and utilities sector recorded the largest numerical decrease among the county sectors with a loss of 1,504 jobs (-8.2 percent).

Among the largest counties in Texas, employment was highest in Harris County (2,262,300) in September 2016, followed by Dallas County (1,662,800). Three other counties, Tarrant, Bexar, and Travis, had employment levels exceeding 700,000. Together, the 26 largest Texas counties accounted for 80.7 percent of total employment within the state. Nationwide, the 344 largest counties made up 72.5 percent of total U.S. employment.

From the third quarter of 2015 to the third quarter of 2016, average weekly wages nationwide increased 5.4 percent to \$1,027. Among large counties in Texas, McLennan registered the largest increase in average weekly wages with a gain of 7.7 percent, while wages in Midland County fell, down 0.3 percent. (See [table 1](#).) In the third quarter of 2016, Harris had the highest average weekly wage among the state's largest counties at \$1,267 and Cameron had the lowest at \$636.

Employment and wage levels (but not over-the-year changes) are also available for the 228 counties in Texas with employment levels below 75,000 in 2015. Among these smaller counties, 212 had average weekly wages below the national average in September 2016. (See [table 2](#).)

Large county wage changes

Ten of Texas's 26 large counties recorded wage growth equal to or above the 5.4-percent national increase from the third quarter of 2015 to the third quarter of 2016. McLennan County's 7.7-percent wage increase was the highest in the state and placed 33rd nationally, followed by Dallas, Denton, and Williamson (6.8 percent

each, 68th), and Tarrant (6.6 percent, 87th). (See [table 1](#).) Fifteen large Texas counties had over-the-year wage increases that were below the national average, and Midland County registered a decrease in average weekly wages, down 0.3 percent.

Nationally, 339 of the 344 largest counties had over-the-year wage increases. Clark, Nev., experienced the largest wage gain in the nation, up 12.2 percent. Manatee, Fla., had the second largest increase (10.7 percent), followed by Hillsborough, N.H. (10.4 percent); four other large U.S. counties had increases above 10.0 percent.

Nationwide, five of the largest counties registered wage declines during the period. Rockland, N.Y., experienced the largest decrease in average weekly wages with a loss of 14.9 percent over the year. Lafayette, La., had the second largest wage decline (-3.4 percent), followed by Benton, Ark. (-2.0 percent), Lake, Ill. (-0.9 percent), and Midland, Texas (-0.3 percent).

Large county average weekly wages

Average weekly wages in 5 of the 26 large Texas counties were more than 14 percent above the national average of \$1,027 in the third quarter of 2016. Harris County led at \$1,267 per week and ranked 23rd among the 344 large counties nationwide. Harris was followed by Dallas (\$1,239, 30th), Collin (\$1,191, 40th), Midland (\$1,176, 43rd), and Travis (\$1,174, 45th). Three additional Texas counties reported average weekly wages above the national average: Jefferson (\$1,061, 81st), Brazoria (\$1,045, 87th), and Tarrant (\$1,029, 101st).

Texas had a number of low-paying large counties. Three of the four lowest-paying large counties in the United States were located along the border with Mexico: Cameron (\$636, 343rd), Hidalgo (\$654, 342nd), and Webb (\$680, 341st). Other Texas counties with low national rankings included El Paso (\$728, 333rd), Brazos (\$772, 327th), and Lubbock (\$811, 306th).

Nationally, weekly wages were higher than the U.S. average in 102 of the largest counties in the country. Santa Clara, Calif., held the top position among the highest-paid large counties with an average weekly wage of \$2,260. San Mateo, Calif., was second at \$2,098, followed by San Francisco, Calif. (\$1,892), New York, N.Y. (\$1,879), and Washington, D.C. (\$1,728).

Among the largest U.S. counties, more than two-thirds (241) reported average weekly wages below the national average in the third quarter of 2016. The lowest wage was reported in Horry, S.C., at \$632 per week, followed by the Texas counties of Cameron and Hidalgo. Wages in these three lowest-ranked counties were less than 30 percent of the average weekly wage in the highest-ranked county, Santa Clara, Calif.

Average weekly wages in smaller Texas counties

Sixteen of the 228 smaller Texas counties – those with employment below 75,000 – reported average weekly wages above the national average of \$1,027. Two of these smaller counties had wages that were also the highest in the state: Carson (\$1,631) and Irion (\$1,333). Delta County registered the lowest weekly wage, averaging \$413 in the third quarter of 2016. (See [table 2](#).)

When all 254 counties in Texas were considered, all but 24 had wages below the national average. Thirty-six counties reported average weekly wages under \$650, 79 registered wages from \$650 to \$749, 70 had wages from \$750 to \$849, 33 had wages from \$850 to \$949, and 36 had wages of \$950 or higher. (See [chart 1](#).) The counties with the highest average weekly wages were located around the larger metropolitan areas of Dallas,

Houston, and Austin, as well as the smaller areas of Midland, Odessa, and Amarillo. Lower-paying counties were concentrated in the agricultural areas of central Texas, the Texas Panhandle, and along the Texas-Mexico border.

Additional statistics and other information

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the Technical Note or visit www.bls.gov/cew.

Employment and Wages Annual Averages Online features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2015 edition of this publication contains selected data produced by Business Employment Dynamics (BED) on job gains and losses, as well as selected data from the first quarter 2016 version of the national news release. Tables and additional content from *Employment and Wages Annual Averages Online* are now available online at www.bls.gov/cew/cewbultn15.htm.

The County Employment and Wages release for fourth quarter 2016 is scheduled to be released on Wednesday, June 7, 2017.

Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The 9.8 million employer reports cover 142.9 million full- and part-time workers. The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS Web site at www.bls.gov/cew/; however, data in QCEW press releases have been revised (see Technical Note below) and may not match the data contained on the Bureau's Web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative

changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from quarterly employment and pay data adjusted for noneconomic county reclassifications.

(3) Ranking does not include data for Puerto Rico or the Virgin Islands.

(4) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.

Virgin Islands.....	37.4	1.4	778	(3)	5.9	(3)

Note: See footnotes at end of table.

(1) Average weekly wages were calculated using unrounded data.

(2) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

(3) Data not included in the national ranking.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.

Chart 1. Average weekly wages by county in Texas, third quarter 2016
