Occupational Employment and Wages in Beaumont-Port Arthur – May 2018

Workers in the Beaumont-Port Arthur Metropolitan Statistical Area had an average (mean) hourly wage of \$23.63 in May 2018, about 5 percent below the nationwide average of \$24.98, according to the U.S. Bureau of Labor Statistics. Assistant Commissioner for Regional Operations Stanley W. Suchman noted that, after testing for statistical significance, wages in the local area were lower than their respective national averages in 11 of the 22 major occupational groups, including education, training, and library; personal care and service; and building and grounds cleaning and maintenance. Four groups had significantly higher wages than their respective national averages, including production; architecture and engineering; and installation, maintenance, and repair.

When compared to the nationwide distribution, local employment was more highly concentrated in 5 of the 22 occupational groups, including construction and extraction; production; and installation, maintenance, and repair. Conversely, 10 groups had employment shares significantly below their national representation, including business and financial operations; computer and mathematical; and office and administrative support. (See [table A](#) and [box notes](#) at end of release.)

Table A. Occupational employment and wages by major occupational group, United States and the Beaumont-Port Arthur Metropolitan Statistical Area, and measures of statistical significance, May 2018

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Beaumont	United States	Beaumont	Percent difference ⁽¹⁾
Total, all occupations	100.0	100.0	\$24.98	\$23.63*	-5
Management	5.3	4.2*	58.44	51.58*	-12
Business and financial operations	5.3	3.4*	36.98	36.60	-1
Computer and mathematical	3.0	1.1*	44.01	36.42*	-17
Architecture and engineering	1.8	2.8*	42.01	47.09*	12
Life, physical, and social science	0.8	1.0	36.62	37.47	2
Community and social service	1.5	1.0*	23.69	21.95*	-7
Legal	0.8	0.6*	52.25	45.45	-13
Education, training, and library	6.1	5.7	27.22	20.60*	-24
Arts, design, entertainment, sports, and media	1.3	0.7*	28.74	23.47*	-18
Healthcare practitioners and technical	6.0	5.8	39.42	33.63*	-15
Healthcare support	2.8	1.9*	15.57	14.84	-5
Protective service	2.4	3.1*	23.36	23.18	-1
Food preparation and serving related	9.2	9.1	12.30	10.27*	-17
Building and grounds cleaning and maintenance	3.1	2.6*	14.43	11.52*	-20
Personal care and service	3.8	3.6	13.51	10.45*	-23
Sales and related	10.0	9.6	20.09	21.50	7
Office and administrative support	15.1	13.9*	18.75	17.37*	-7
Farming, fishing, and forestry	0.3	0.1*	14.49	18.15*	25

Note: See footnotes at end of table.

Table A. Occupational employment and wages by major occupational group, United States and the Beaumont-Port Arthur Metropolitan Statistical Area, and measures of statistical significance, May 2018 - Continued

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Beaumont	United States	Beaumont	Percent difference ⁽¹⁾
Construction and extraction.....	4.1	9.0*	24.62	23.80*	-3
Installation, maintenance, and repair	3.9	5.2*	23.54	24.63*	5
Production	6.3	8.9*	18.84	29.19*	55
Transportation and material moving.....	7.1	6.4	18.41	17.97	-2

Footnotes:

(1) A positive percent difference measures how much the mean wage in the Beaumont-Port Arthur Metropolitan Statistical Area is above the national mean wage, while a negative difference reflects a lower wage.

* The mean hourly wage or percent share of employment is significantly different from the national average of all areas at the 90-percent confidence level.

One occupational group—production—was chosen to illustrate the diversity of data available for any of the 22 major occupational categories. Beaumont-Port Arthur had 14,250 jobs in production, accounting for 8.9 percent of local area employment, significantly higher than the 6.3-percent share nationally. The average hourly wage for this occupational group locally was \$29.19, significantly above the national wage of \$18.84.

Some of the larger detailed occupations within the production group included welders, cutters, solderers, and brazers (1,900), chemical equipment operators and tenders (1,820), and first-line supervisors of production and operating workers (1,640). Among the higher-paying jobs in this group were first-line supervisors of production and operating workers and petroleum pump system operators, refinery operators, and gaugers, with mean hourly wages of \$51.29 and \$39.26, respectively. At the lower end of the wage scale were wood sawing machine setters, operators, and tenders, (\$11.64) and laundry and dry-cleaning workers (\$13.10). (Detailed data for the production occupations are presented in [table 1](#); for a complete listing of detailed occupations available go to www.bls.gov/oes/current/oes_13140.htm .)

Location quotients allow us to explore the occupational make-up of a metropolitan area by comparing the composition of jobs in an area relative to the national average. (See [table 1](#).) For example, a location quotient of 2.0 indicates that an occupation accounts for twice the share of employment in the area than it does nationally. In the Beaumont-Port Arthur Metropolitan Statistical Area, above-average concentrations of employment were found in many of the occupations within the production group. For instance, petroleum pump system operators, refinery operators, and gaugers were employed at 38.0 times the national rate in Beaumont, and chemical equipment operators and tenders, at 19.9 times the U.S. average. These two location quotients in Beaumont were among the highest in all the published metropolitan areas nationwide for these particular occupations. On the other hand, machinists had a location quotient of 1.0 in Beaumont, indicating that this particular occupation’s local and national employment shares were similar.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the Texas Workforce Commission.

Area Changes to the May 2018 Occupational Employment Statistics (OES)

OES continues to publish data for metropolitan and nonmetropolitan areas that cover the full geography of the United States. However, the level of detail available has decreased.

OES no longer publishes data for metropolitan divisions. Data for the 11 large metropolitan areas that contain divisions are now available at the Metropolitan Statistical Area (MSA) or New England City and Town Area (NECTA) level only.

In addition, some smaller nonmetropolitan areas have been combined to form larger nonmetropolitan areas. The May 2018 OES estimates contain data for 134 nonmetropolitan areas, compared with 167 nonmetropolitan areas in the May 2017 estimates.

More information on these area changes is available at www.bls.gov/oes/areas_2018.htm.

Implementing the 2018 Standard Occupational Classification (SOC) System

The OES program plans to begin implementing the 2018 Standard Occupational Classification (SOC) system with the May 2019 estimates, to be released by early April of 2020. Because each set of OES estimates is produced by combining three years of survey data, estimates for May 2019 and May 2020 will be based on a combination of survey data collected under the 2010 SOC and data collected under the 2018 SOC, and will use a hybrid of the two classification systems. The May 2021 OES estimates, to be released by early April of 2022, will be the first set of estimates based fully on the 2018 SOC. For more information, please see www.bls.gov/oes/soc_2018.htm.

Technical Note

The Occupational Employment Statistics (OES) survey is a semiannual survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 580 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-digit, most 4-digit, and selected 5- and 6-digit industry levels, and national estimates by ownership across all industries and for schools and hospitals. OES data are available at www.bls.gov/oes/tables.htm.

The OES survey is a cooperative effort between BLS and the State Workforce Agencies (SWAs). BLS funds the survey and provides the procedures and technical support, while the State Workforce Agencies collect most of the data. OES estimates are constructed from a sample of about 1.2 million establishments. Each year, two semiannual panels of approximately 180,000 to 200,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2018 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2018, November 2017, May 2017, November 2016, May 2016, and November 2015. The unweighted sample employment of 83 million across all six semiannual panels represents approximately 58 percent of total national employment. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 71 percent based on establishments and 68

percent based on weighted sampled employment. The sample in the Beaumont-Port Arthur Metropolitan Statistical Area included 1,795 establishments with a response rate of 54 percent. For more information about OES concepts and methodology, go to www.bls.gov/oes/current/oes_tec.htm.

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

The May 2018 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2017 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at www.bls.gov/soc and information about the 2017 NAICS is available at www.bls.gov/bls/naics.htm.

Metropolitan area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget.

The **Beaumont-Port Arthur Metropolitan Statistical Area** includes Hardin, Jefferson, Newton, and Orange Counties in Texas.

Additional information

OES data are available on our regional web page at www.bls.gov/regions/southwest. Answers to frequently asked questions about the OES data are available at www.bls.gov/oes/oes_ques.htm. Detailed technical information about the OES survey is available in our Survey Methods and Reliability Statement on the BLS website at www.bls.gov/oes/current/methods_statement.pdf.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Table 1. Employment and wage data from the Occupational Employment Statistics survey, by occupation, Beaumont-Port Arthur Metropolitan Statistical Area, May 2018

Occupation ⁽¹⁾	Employment		Mean wages	
	Level ⁽²⁾	Location quotient ⁽³⁾	Hourly	Annual ⁽⁴⁾
Production occupations	14,250	1.4	\$29.19	\$60,710
First-line supervisors of production and operating workers	1,640	2.4	51.29	106,680
Electrical, electronic, and electromechanical assemblers, except coil winders, tapers, and finishers ...	120	0.4	15.07	31,350
Structural metal fabricators and fitters	300	3.5	24.26	50,460
Assemblers and fabricators, all other, including team assemblers	350	0.2	16.11	33,510
Bakers	(5)	(5)	10.53	21,900
Butchers and meat cutters	70	0.5	13.52	28,120
Computer-controlled machine tool operators, metal and plastic	120	0.7	20.62	42,890
Cutting, punching, and press machine setters, operators, and tenders, metal and plastic	270	1.3	18.81	39,120
Lathe and turning machine tool setters, operators, and tenders, metal and plastic	(5)	(5)	19.53	40,630
Machinists	410	1.0	26.86	55,870
Welders, cutters, solderers, and brazers	1,900	4.4	27.25	56,680
Metal workers and plastic workers, all other	50	2.0	20.21	42,030
Printing press operators	50	0.3	19.30	40,140
Laundry and dry-cleaning workers	330	1.4	13.10	27,240
Sewing machine operators	40	0.3	11.62	24,160
Cabinetmakers and bench carpenters	60	0.6	16.56	34,450
Sawing machine setters, operators, and tenders, wood ..	260	4.5	11.64	24,210
Woodworking machine setters, operators, and tenders, except sawing	240	2.8	14.15	29,440
Power plant operators	50	1.4	37.80	78,620
Water and wastewater treatment plant and system operators	200	1.5	21.21	44,120
Chemical plant and system operators	370	12.0	34.65	72,070
Petroleum pump system operators, refinery operators, and gaugers	1,630	38.0	39.26	81,670
Chemical equipment operators and tenders	1,820	19.9	34.46	71,680
Crushing, grinding, and polishing machine setters, operators, and tenders	80	2.3	14.99	31,170
Grinding and polishing workers, hand	50	1.5	10.77	22,410
Mixing and blending machine setters, operators, and tenders	120	0.8	23.33	48,530
Inspectors, testers, sorters, samplers, and weighers	770	1.3	26.61	55,340
Dental laboratory technicians	(5)	(5)	13.64	28,370
Ophthalmic laboratory technicians	40	1.3	12.44	25,880
Packaging and filling machine operators and tenders ...	150	0.3	23.81	49,530
Coating, painting, and spraying machine setters, operators, and tenders	300	3.1	22.20	46,170
Painters, transportation equipment	90	1.5	27.40	56,990
Paper goods machine setters, operators, and tenders ...	190	1.8	30.06	62,530
Helpers--production workers	630	1.6	14.80	30,790
Production workers, all other	(5)	(5)	19.13	39,790

Footnotes:

(1) For a complete listing of all detailed occupations in the Beaumont-Port Arthur, TX Metropolitan Statistical Area, see www.bls.gov/oes/current/oes_13140.htm

(2) Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

(3) The location quotient is the ratio of the area concentration of occupational employment to the national average concentration. A location quotient greater than one indicates the occupation has a higher share of employment than average, and a location quotient less than one indicates the occupation is less prevalent in the area than average.

(4) Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.
(5) Estimate not released.
