Occupational Employment and Wages in Boise City — May 2016

Workers in the Boise City Metropolitan Statistical Area had an average (mean) hourly wage of \$20.69 in May 2016, about 13 percent below the nationwide average of \$23.86, according to the U.S. Bureau of Labor Statistics. Assistant Commissioner for Regional Operations Richard Holden noted that, after testing for statistical significance, no wages in the local area were higher than their respective national averages in 22 major occupational groups. Twenty groups had significantly lower wages than their respective national averages, including management; legal; and computer and mathematical.

When compared to the nationwide distribution, local employment was more highly concentrated in 7 of the 22 occupational groups, including construction and extraction; office and administrative support; and management. Conversely, eight groups had employment shares significantly below their national representation, including transportation and material moving; production; and education, training, and library. (See [table A](#) and [box note](#) at end of release.)

Table A. Occupational employment and wages by major occupational group, United States and the Boise City Metropolitan Statistical Area, and measures of statistical significance, May 2016

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Boise City	United States	Boise City	Percent difference ⁽¹⁾
Total, all occupations	100.0	100.0	\$23.86	\$20.69*	-13
Management	5.1	5.9*	56.74	40.89*	-28
Business and financial operations	5.2	4.7*	36.09	31.03*	-14
Computer and mathematical	3.0	3.0	42.25	32.93*	-22
Architecture and engineering	1.8	2.5*	40.53	38.55	-5
Life, physical, and social science	0.8	0.9*	35.06	26.71*	-24
Community and social service.....	1.4	1.7*	22.69	20.59*	-9
Legal.....	0.8	0.7	50.95	37.61*	-26
Education, training, and library.....	6.2	5.4*	26.21	18.87*	-28
Arts, design, entertainment, sports, and media.....	1.4	1.5	28.07	21.30*	-24
Healthcare practitioners and technical	5.9	5.6*	38.06	36.68	-4
Healthcare support	2.9	2.5*	14.65	13.94*	-5
Protective service	2.4	1.9*	22.03	19.17*	-13
Food preparation and serving related	9.2	8.8*	11.47	10.09*	-12
Building and grounds cleaning and maintenance ...	3.2	3.3	13.47	12.45*	-8
Personal care and service.....	3.2	3.6	12.74	10.96*	-14

Production	6.5	5.5*	17.88	16.16*	-10

Note: See footnotes at end of table.

Table A. Occupational employment and wages by major occupational group, United States and the Boise City Metropolitan Statistical Area, and measures of statistical significance, May 2016 - Continued

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Boise City	United States	Boise City	Percent difference ⁽¹⁾
Transportation and material moving	6.9	5.4*	17.34	15.63*	-10

Footnotes:

(1) A positive percent difference measures how much the mean wage in the Boise City Metropolitan Statistical Area is above the national mean wage, while a negative difference reflects a lower wage.

* The percent share of employment or mean hourly wage for this area is significantly different from the national average of all areas at the 90-percent confidence level.

One occupational group—construction and extraction—was chosen to illustrate the diversity of data available for any of the 22 major occupational categories. Boise City had 15,610 jobs in construction and extraction, accounting for 5.3 percent of local area employment, significantly higher than the 4.0-percent share nationally. The average hourly wage for this occupational group locally was \$19.24, significantly below the national wage of \$23.51.

Some of the larger detailed occupations within the construction and extraction group included construction laborers (2,330), carpenters (2,070), and electricians (1,780). Among the higher paying jobs were boilermakers and first-line supervisors of construction trades and extraction workers, with mean hourly wages of \$30.75 and \$26.63, respectively. At the lower end of the wage scale were floor, ceiling, and wall insulation workers (\$13.73) and construction laborers (\$14.11). (Detailed occupational data for construction and extraction are presented in [table 1](#); for a complete listing of detailed occupations available go to www.bls.gov/oes/2016/may/oes_14260.htm.)

Location quotients allow us to explore the occupational make-up of a metropolitan area by comparing the composition of jobs in an area relative to the national average. (See [table 1](#).) For example, a location quotient of 2.0 indicates that an occupation accounts for twice the share of employment in the area than it does nationally. In the Boise City Metropolitan Statistical Area, above-average concentrations of employment were found in some of the occupations within the construction and extraction group. For instance, drywall and ceiling tile installers were employed at 4.0 times the national rate in Boise City, and cement masons and concrete finishers, at 2.0 times the U.S. average. On the other hand, operating engineers and other construction equipment operators had a location quotient of 1.1 in Boise City, indicating that this particular occupation’s local and national employment shares were similar.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the Idaho Department of Labor.

Notes on Occupational Employment Statistics Data

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

Technical Note

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 650 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), metropolitan divisions, nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-, 4-, and selected 5- and 6-digit industry levels, and national estimates by ownership across all industries and for schools and hospitals. OES data are available at www.bls.gov/oes/tables.htm.

OES estimates are constructed from a sample of about 1.2 million establishments. Each year, two semiannual panels of approximately 200,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2016 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2016, November 2015, May 2015, November 2014, May 2014, and November 2013. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 73 percent based on establishments and 69 percent based on weighted sampled employment. The unweighted employment of sampled establishments across all six semiannual panels represents approximately 58 percent of total national employment. The sample in the Boise City Metropolitan Statistical Area included 2,746 establishments with a response rate of 76 percent. For more information about OES concepts and methodology, go to www.bls.gov/news.release/ocwage.tn.htm.

The May 2016 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2012 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at www.bls.gov/soc and information about the 2012 NAICS is available at www.bls.gov/bls/naics.htm.

Metropolitan area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget.

The **Boise City, Idaho Metropolitan Statistical Area** includes Ada, Boise, Canyon, Gem, and Owyhee Counties.

Additional information

OES data are available on our regional web page at www.bls.gov/regions/west. Answers to frequently asked questions about the OES data are available at www.bls.gov/oes/oes_ques.htm. Detailed technical information about the OES survey is available in our Survey Methods and Reliability Statement on the BLS website at www.bls.gov/oes/current/methods_statement.pdf.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Table 1. Employment and wage data from the Occupational Employment Statistics survey, by occupation, Boise City Metropolitan Statistical Area, May 2016

Occupation ⁽¹⁾	Employment		Mean wages	
	Level ⁽²⁾	Location quotient ⁽³⁾	Hourly	Annual ⁽⁴⁾
Construction and extraction occupations	15,610	1.3	\$19.24	\$40,010
First-line supervisors of construction trades and extraction workers	1,450	1.3	26.63	55,390
Boilermakers	(5)	(5)	30.75	63,970
Brickmasons and blockmasons	130	0.9	23.38	48,630
Carpenters	2,070	1.5	16.10	33,480
Carpet installers	(5)	(5)	23.94	49,800
Tile and marble setters	60	0.7	14.96	31,120
Cement masons and concrete finishers	730	2.0	17.15	35,680
Construction laborers	2,330	1.2	14.11	29,340
Paving, surfacing, and tamping equipment operators	(5)	(5)	21.60	44,920
Operating engineers and other construction equipment operators	820	1.1	20.23	42,080
Drywall and ceiling tile installers	790	4.0	17.25	35,880
Tapers	170	4.2	18.14	37,740
Electricians	1,780	1.4	22.54	46,890
Glaziers	420	4.3	22.04	45,840
Insulation workers, floor, ceiling, and wall	(5)	(5)	13.73	28,570
Insulation workers, mechanical	(5)	(5)	24.89	51,770
Painters, construction and maintenance	810	1.8	14.25	29,640
Pipelayers	(5)	(5)	17.70	36,820
Plumbers, pipefitters, and steamfitters	1,020	1.2	25.30	52,620
Plasterers and stucco masons	(5)	(5)	14.29	29,720
Roofers	490	2.0	19.97	41,540
Sheet metal workers	200	0.7	16.64	34,610
Helpers--brickmasons, blockmasons, stonemasons, and tile and marble setters	100	2.1	16.46	34,230
Helpers--electricians	60	0.4	14.87	30,920
Helpers--pipelayers, plumbers, pipefitters, and steamfitters	(5)	(5)	17.97	37,380
Construction and building inspectors	160	0.8	24.52	51,000
Hazardous materials removal workers	(5)	(5)	18.25	37,950
Highway maintenance workers	220	0.7	17.47	36,340

Footnotes:

(1) For a complete listing of all detailed occupations in the Boise City, ID, see www.bls.gov/oes/current/oes_14260.htm

(2) Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

(3) The location quotient is the ratio of the area concentration of occupational employment to the national average concentration. A location quotient greater than one indicates the occupation has a higher share of employment than average, and a location quotient less than one indicates the occupation is less prevalent in the area than average.

(4) Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

(5) Estimate not released.
