## **County Employment and Wages in Idaho – First Quarter 2018**

Idaho's only large county, Ada, had an employment increase of 4.5 percent from March 2017 to March 2018, the U.S. Bureau of Labor Statistics reported today. (Large counties are those with 2017 annual average employment levels of 75,000 or more.) Assistant Commissioner for Regional Operations Richard Holden noted that the rate of employment growth in Ada County was faster-paced than the national increase of 1.6 percent. (See [table 1.](#))

Nationally, employment increased in 314 of the 349 large counties. Midland, Texas, had the largest percentage increase in employment, up 12.6 percent over the year. Kanawha, W.Va., had the largest employment decrease with a loss of 1.4 percent.

Employment in Ada County was 239,900 in March 2018, accounting for one-third of the total employment in Idaho. Nationwide, the 349 largest counties made up 73.1 percent of total U.S. employment.

Employment and wage levels (but not over-the-year changes) are also available for the 43 counties in Idaho with employment below 75,000. All except one of these smaller counties had an average weekly wage below the national average in the first quarter of 2018. (See [table 2.](#))

### **Large county wage changes**

From the first quarter of 2017 to the first quarter of 2018, the average weekly wage in Ada County increased 5.1 percent, ranking it 34<sup>th</sup> among the 349 largest U.S. counties. Nationally, the average weekly wage increased 3.7 percent. (See [table 1.](#))

Among the 349 largest U.S. counties, 336 had over-the-year increases in average weekly wages. Peoria, Ill., had the largest percentage wage increase, (23.8 percent). Of the 13 counties with over-the-year decreases in average weekly wages, Forsyth, N.C., had the largest decrease (-4.8 percent).

### **Large county average weekly wages**

Ada County's \$943 average weekly wage ranked in the bottom half of the 349 largest U.S. counties. Nationally, the average weekly wage was \$1,152 in the first quarter of 2018.

Nationwide, 90 large counties had average weekly wages equal to or above the U.S. average of \$1,152 in the first quarter of 2018. New York, N.Y., held the top position with an average weekly wage of \$3,087. Santa Clara, Calif., was second at \$2,651, followed by San Mateo, Calif. (\$2,606), and San Francisco, Calif. (\$2,485).

In the first quarter of 2018, nearly three-fourths of the largest U.S. counties (259) reported wages below the national weekly average of \$1,152. Cameron, Texas, reported the lowest wage (\$628), followed by Horry County, S.C. (\$631), and the Texas counties of Hidalgo (\$657) and Webb (\$690).

### **Average weekly wages in Idaho's smaller counties**

Among the 43 counties in Idaho with employment below 75,000, only Butte County (\$1,742) had an average weekly wage above the national average of \$1,152. Boise County reported the lowest average weekly wage in the state, averaging \$441 in the first quarter of 2018. (See [table 2](#).)

When all 44 counties in Idaho were considered, 6 reported average weekly wages under \$600, 22 reported wages from \$600 to \$699, 10 had wages from \$700 to \$799, 1 had wages from \$800 to \$899, and 5 had wages at \$900 or above. (See [chart 1](#).)

### **Additional statistics and other information**

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit [www.bls.gov/cew](http://www.bls.gov/cew).

*Employment and Wages Annual Averages Online* features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2017 edition of this publication contains selected data produced by Business Employment Dynamics (BED) on job gains and losses, as well as selected data from the first quarter 2018 version of the national news release. Tables and additional content from *Employment and Wages Annual Averages 2017* are now available online at <https://www.bls.gov/cew/publications/employment-and-wages-annual-averages/2017/home.htm>. The 2018 edition of *Employment and Wages Annual Averages Online* will be available in September 2019.

---

**The County Employment and Wages release for second quarter 2018 is scheduled to be released on Thursday, December 6, 2018.**

### **Technical Note**

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The 10.0 million employer reports cover 144.6 million full- and part-time workers. The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS Web site at [www.bls.gov/cew/](http://www.bls.gov/cew/); however, data in QCEW press releases have been revised and may not match the data contained on the Bureau's Web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

**Table 1. Covered employment and wages in the United States and the largest county in Idaho, first quarter 2018**

Area	Employment			Average weekly wage <sup>(1)</sup>			
	March 2018 (thousands)	Percent change, March 2017-18 <sup>(2)</sup>	National ranking by percent change <sup>(3)</sup>	Average weekly wage	National ranking by level <sup>(3)</sup>	Percent change, first quarter 2017-18 <sup>(2)</sup>	National ranking by percent change <sup>(3)</sup>
United States <sup>(4)</sup> .....	144,562.9	1.6	--	1152	--	3.7	--
Idaho .....	712.6	3.5	--	809	50	4.3	7
Ada, Idaho .....	239.9	4.5	9	943	220	5.1	34

Footnotes:

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from quarterly employment and pay data adjusted for noneconomic county reclassifications.

(3) Ranking does not include data for Puerto Rico or the Virgin Islands.

(4) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.
