## Occupational Employment and Wages in Oakland-Hayward-Berkeley — May 2017

Workers in the Oakland-Hayward-Berkeley Metropolitan Division had an average (mean) hourly wage of \$30.20 in May 2017, about 24 percent above the nationwide average of \$24.34, according to the U.S. Bureau of Labor Statistics. Assistant Commissioner for Regional Operations Richard Holden noted that, after testing for statistical significance, wages in the local area were higher than their respective national averages in 21 of the 22 major occupational groups, including healthcare practitioners and technical; management; and construction and extraction.

When compared to the nationwide distribution, local employment was more highly concentrated in 9 of the 22 occupational groups, including personal care and service; management; and business and financial operations. Conversely, 10 groups had employment shares significantly below their national representation, including office and administrative support; transportation and material moving; and food preparation and serving related. (See [table A](#) and [box note](#) at end of release.)

**Table A. Occupational employment and wages by major occupational group, United States and the Oakland-Hayward-Berkeley Metropolitan Division, and measures of statistical significance, May 2017**

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Oakland	United States	Oakland	Percent difference <sup>(1)</sup>
Total, all occupations .....	100.0	100.0	\$24.34	\$30.20*	24
Management .....	5.1	6.3*	57.65	67.47*	17
Business and financial operations .....	5.2	6.1*	36.70	43.04*	17
Computer and mathematical .....	3.0	3.6*	43.18	51.87*	20
Architecture and engineering .....	1.8	2.5*	41.44	47.58*	15
Life, physical, and social science .....	0.8	1.6*	35.76	43.45*	22
Community and social service .....	1.5	1.6	23.10	27.82*	20
Legal .....	0.8	0.7	51.62	58.87*	14
Education, training, and library .....	6.1	6.5*	26.67	29.88*	12
Arts, design, entertainment, sports, and media .....	1.4	1.7*	28.34	27.15	-4
Healthcare practitioners and technical .....	6.0	5.2*	38.83	49.57*	28
Healthcare support .....	2.9	2.3*	15.05	19.04*	27
Protective service .....	2.4	1.8*	22.69	30.51*	34
Food preparation and serving related .....	9.3	8.4*	11.88	14.26*	20
Building and grounds cleaning and maintenance .....	3.1	2.7*	13.91	18.09*	30
Personal care and service .....	3.6	5.4*	13.11	14.59*	11
Sales and related .....	10.2	9.4*	19.56	22.77*	16

Farming, fishing, and forestry .....	0.3	0.1*	13.87	15.93*	15
Construction and extraction .....	4.0	4.9*	24.01	32.78*	37

Note: See footnotes at end of table.

**Table A. Occupational employment and wages by major occupational group, United States and the Oakland-Hayward-Berkeley Metropolitan Division, and measures of statistical significance, May 2017 - Continued**

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Oakland	United States	Oakland	Percent difference <sup>(1)</sup>
Installation, maintenance, and repair .....	3.9	3.2*	23.02	28.28*	23
Production .....	6.3	5.7	18.30	20.80*	14
Transportation and material moving .....	7.0	6.1*	17.82	20.88*	17

Footnotes:

(1) A positive percent difference measures how much the mean wage in the Oakland-Hayward-Berkeley Metropolitan Division is above the national mean wage, while a negative difference reflects a lower wage.

\* The percent share of employment or mean hourly wage for this area is significantly different from the national average of all areas at the 90-percent confidence level.

One occupational group—personal care and service—was chosen to illustrate the diversity of data available for any of the 22 major occupational categories. Oakland-Hayward-Berkeley had 61,210 jobs in personal care and service, accounting for 5.4 percent of local area employment, significantly higher than the 3.6-percent share nationally. The average hourly wage for this occupational group locally was \$14.59, significantly above the national wage of \$13.11.

Some of the larger detailed occupations within the personal care and service group included personal care aides (36,060), recreation workers (4,590), and childcare workers (3,450). Among the higher paying jobs were animal trainers and first-line supervisors of gaming workers, with mean hourly wages of \$25.49 and \$24.72, respectively. At the lower end of the wage scale were ushers, lobby attendants, and ticket takers (\$11.55) and gaming dealers (\$11.69). (Detailed occupational data for personal care and service are presented in [table 1](#); for a complete listing of detailed occupations available go to [www.bls.gov/oes/current/oes\\_36084.htm](http://www.bls.gov/oes/current/oes_36084.htm) .)

Location quotients allow us to explore the occupational make-up of a metropolitan area by comparing the composition of jobs in an area relative to the national average. (See [table 1](#).) For example, a location quotient of 2.0 indicates that an occupation accounts for twice the share of employment in the area than it does nationally. In the Oakland-Hayward-Berkeley Metropolitan Division, above-average concentrations of employment were found in some of the occupations within the personal care and service group. For instance, manicurists and pedicurists were employed at 2.4 times the national rate in Oakland, and personal care aides, at 2.2 times the U.S. average. On the other hand, nonfarm animal caretakers had a location quotient of 1.0 in Oakland, indicating that this particular occupation's local and national employment shares were similar.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the California Employment Development Department.

## **Notes on Occupational Employment Statistics Data**

With the release of the May 2017 estimates, the OES program has replaced 21 detailed occupations found in the 2010 Standard Occupational Classification (SOC) with 10 new aggregations of those occupations. In addition, selected 4- and 5-digit North American Industry Classification System (NAICS) industries previously published by OES will no longer be published separately. Some of the 4-digit NAICS industries that are no longer being published separately will instead be published as OES-specific industry aggregations. More information about the new occupational and industry aggregations is available at [www.bls.gov/oes/changes\\_2017.htm](http://www.bls.gov/oes/changes_2017.htm).

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

## **Technical Note**

The Occupational Employment Statistics (OES) survey is a semiannual survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 650 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), metropolitan divisions, nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-, 4-, and selected 5- and 6-digit industry levels, and national estimates by ownership across all industries and for schools and hospitals. OES data are available at [www.bls.gov/oes/tables.htm](http://www.bls.gov/oes/tables.htm).

OES estimates are constructed from a sample of about 1.2 million establishments. Each year, two semiannual panels of approximately 200,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2017 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2017, November 2016, May 2016, November 2015, May 2015, and November 2014. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 72 percent based on establishments and 68 percent based on weighted sampled employment. The unweighted sample employment of 82 million across all six semiannual panels represents approximately 58 percent of total national employment. The sample in the Oakland-Hayward-Berkeley Metropolitan Division included 5,854 establishments with a response rate of 61 percent. For more information about OES concepts and methodology, go to [www.bls.gov/oes/current/oes\\_tec.htm](http://www.bls.gov/oes/current/oes_tec.htm).

The May 2017 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2012 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at [www.bls.gov/soc](http://www.bls.gov/soc) and information about the 2012 NAICS is available at [www.bls.gov/bls/naics.htm](http://www.bls.gov/bls/naics.htm).

## **Metropolitan area definitions**

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget.

The **Oakland-Hayward-Berkeley, Calif. Metropolitan Division** includes Alameda and Contra Costa Counties.

### **Additional information**

OES data are available on our regional web page at [www.bls.gov/regions/west](http://www.bls.gov/regions/west). Answers to frequently asked questions about the OES data are available at [www.bls.gov/oes/oes\\_ques.htm](http://www.bls.gov/oes/oes_ques.htm). Detailed technical information about the OES survey is available in our Survey Methods and Reliability Statement on the BLS website at [www.bls.gov/oes/current/methods\\_statement.pdf](http://www.bls.gov/oes/current/methods_statement.pdf).

Information in this release will be made available to sensory impaired individuals upon request . Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

**Table 1. Employment and wage data from the Occupational Employment Statistics survey, by occupation, Oakland-Hayward-Berkeley Metropolitan Division, May 2017**

Occupation <sup>(1)</sup>	Employment		Mean wages	
	Level <sup>(2)</sup>	Location quotient <sup>(3)</sup>	Hourly	Annual <sup>(4)</sup>
Personal care and service occupations.....	61,210	1.5	\$14.59	\$30,350
First-line supervisors of gaming workers.....	130	0.6	24.72	51,420
First-line supervisors of personal service workers .....	2,140	1.3	22.83	47,490
Animal trainers .....	210	1.8	25.49	53,020
Nonfarm animal caretakers .....	1,540	1.0	13.18	27,420
Gaming dealers .....	730	1.0	11.69	24,310
Gaming service workers, all other .....	80	1.1	14.98	31,160
Ushers, lobby attendants, and ticket takers .....	710	0.7	11.55	24,020
Amusement and recreation attendants .....	2,390	1.0	12.80	26,620
Locker room, coatroom, and dressing room attendants..	80	0.6	15.91	33,100
Funeral attendants .....	(5)	(5)	20.06	41,720
Hairdressers, hairstylists, and cosmetologists .....	1,940	0.7	16.33	33,970
Manicurists and pedicurists .....	1,960	2.4	12.19	25,360
Skincare specialists .....	770	2.2	14.34	29,830
Baggage porters and bellhops .....	(5)	(5)	16.14	33,570

Recreation workers .....	4,590	1.6	16.09	33,470
Residential advisors .....	490	0.6	18.93	39,370
Personal care and service workers, all other .....	50	0.1	14.81	30,800

**Footnotes:**

(1) For a complete listing of all detailed occupations in Oakland-Hayward-Berkeley, CA Metropolitan Division, see [www.bls.gov/oes/current/oes\\_36084.htm](http://www.bls.gov/oes/current/oes_36084.htm)

(2) Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

(3) The location quotient is the ratio of the area concentration of occupational employment to the national average concentration. A location quotient greater than one indicates the occupation has a higher share of employment than average, and a location quotient less than one indicates the occupation is less prevalent in the area than average.

(4) Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

(5) Estimate not released.
