## Fatal Work Injuries in Oregon – 2017

Fatal work injuries totaled 60 in 2017 for Oregon, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Richard Holden noted that the number of work-related fatalities in Oregon was lower than the 72 fatalities in the previous year. Fatal occupational injuries in the state have ranged from a high of 88 in 1992 to a low of 43 in 2012. (See [chart 1](#).)

Nationwide, a total of 5,147 fatal work injuries were recorded in 2017, down slightly from the 5,190 fatal injuries in 2016, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

**Chart 1. Total fatal occupational injuries, Oregon, 2008-2017**

SOURCE: U.S. Bureau of Labor Statistics.

### Type of incident

In Oregon, transportation incidents resulted in 29 fatal work injuries, and contact with objects and equipment accounted for 13 fatalities. These two major categories accounted for 70 percent of all workplace fatalities in the state. (See [table 1](#).) The number of worker deaths from transportation incidents was little changed over the year, while work related fatalities from contact with objects and equipment fell by four.

Nationally, transportation incidents were the most frequent fatal workplace event in 2017, accounting for 40 percent of fatal work injuries. (See [chart 2](#).) Falls, slips, or trips was the second-most common fatal event (17 percent), followed by violence and other injuries by persons or animals (16 percent).

SOURCE: U.S. Bureau of Labor Statistics.

### Industry

The private agriculture, forestry, fishing and hunting industry sector had the highest number of fatalities in Oregon with 16, compared to 27 in the previous year. (See [table 2](#).) Transportation incidents were the most frequent fatal event in the sector with six worker deaths. Five of those fatally injured in this sector worked in logging.

The private transportation and warehousing sector had 13 workplace fatalities in 2017. General freight trucking accounted for six fatalities in this industry.

### Occupation

Transportation and material moving occupations had the highest number of workplace fatalities with 23. (See [table 3](#).) Fifteen of these fatalities were heavy and tractor-trailer truck drivers.

### Additional highlights:

- Men accounted for 93 percent of the work-related fatalities in Oregon, the same as the national share. (See [table 4](#).) Transportation incidents made up 46 percent of the fatalities for men in Oregon.
- White non-Hispanics accounted for 87 percent of those who died from a workplace injury. Nationwide, this group accounted for 67 percent of work-related deaths.

- Workers 25-54 years old accounted for 55 percent of the state's work-related fatalities in 2017, equal to the national rate.
- Of the 72 fatally-injured workers in Oregon, 78 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for wage and salary workers was transportation incidents.

### Technical Note

**Background of the program.** The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2016 national data, over 23,300 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS website at [www.bls.gov/opub/hom/cfoi/home.htm](http://www.bls.gov/opub/hom/cfoi/home.htm).

**Federal/State agency coverage.** The CFOI includes data for all fatal work injuries, even those that may be outside the scope of other agencies or regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency. More on the scope of CFOI can be found at [www.bls.gov/iif/cfoiscope.htm](http://www.bls.gov/iif/cfoiscope.htm).

**Acknowledgments.** BLS appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200. Federal Relay Service: (800) 877-8339.

**Table 1. Fatal occupational injuries by event or exposure, Oregon, 2016–17**

Event or exposure <sup>(1)</sup>	2016	2017	
	Number	Number	Percent
Total.....	72	60	100
Violence and other injuries by persons or animals.....	10	6	10

Struck by powered vehicle--nontransport.....	4	4	7

## Footnotes:

(1) Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

Heavy and tractor-trailer truck drivers .....	13	15	25

## Footnotes:

(1) Occupation data are based on the Standard Occupational Classification system, 2010.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

**Table 4. Fatal occupational injuries by selected demographic characteristics, Oregon, 2016–17**

Worker characteristics	2016	2017	
	Number	Number	Percent
Total.....	72	60	100
<b>Employee status</b>			
Wage and salary workers <sup>(1)</sup> .....	58	47	78
Self-employed <sup>(2)</sup> .....	14	13	22
<b>Gender</b>			
Men.....	63	56	93
Women.....	9	4	7
<b>Age <sup>(3)</sup></b>			
20 to 24 years.....	--	1	2
25 to 54 years.....	11	11	18
35 to 44 years.....	8	12	20
45 to 54 years.....	20	10	17
55 to 64 years.....	20	17	28
65 years and over.....	9	9	15
<b>Race or ethnic origin <sup>(4)</sup></b>			
White (non-Hispanic).....	56	52	87
Black or African-American (non-Hispanic).....	--	--	--
Hispanic or Latino.....	12	5	8

Footnotes:

(1) May include volunteers and workers receiving other types of compensation.

(2) Includes self-employed workers, owners of unincorporated businesses and farms, paid and unpaid family workers, and may include some owners of incorporated businesses or members of partnerships.

(3) Information may not be available for all age groups.

(4) Persons identified as Hispanic or Latino may be of any race. The race categories shown exclude Hispanic and Latino workers.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.
