## **Average Energy Prices, Los Angeles-Long Beach-Anaheim – May 2020**

Gasoline prices averaged \$2.802 a gallon in the Los Angeles-Long Beach-Anaheim area in May 2020, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Richard Holden noted that area gasoline prices were lower than last May when they averaged \$4.012 per gallon. Los Angeles area households paid an average of 19.9 cents per kilowatt hour (kWh) of electricity in May 2020, higher than the 18.6 cents price per kWh paid in May 2019. The average cost of utility (piped) gas at \$1.456 per therm in May was higher than the \$1.257 per therm spent last year. (Data in this release are not seasonally adjusted; accordingly, over-the-year-analysis is used throughout.)

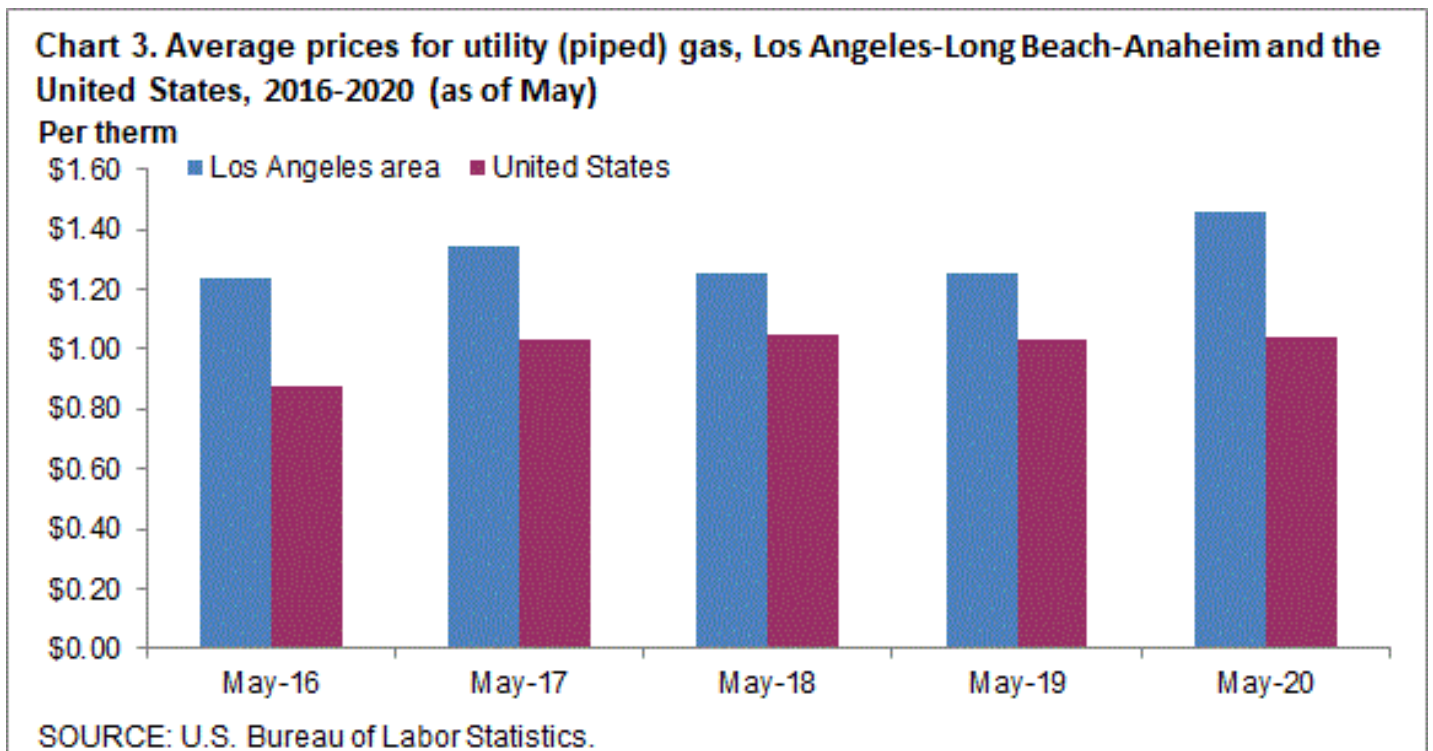

At \$2.802 a gallon, Los Angeles area consumers paid 44.0 percent more than the \$1.946 national average in May 2020. A year earlier, consumers in the Los Angeles area paid 35.4 percent more than the national average for a gallon of gasoline. The local price of a gallon of gasoline has ranged from 20.4 to 44.0 percent above the national average in the month of May during the past five years. (See [chart 1.](#))

The 19.9 cents per kWh Los Angeles households paid for electricity in May 2020 was 48.5 percent more than the nationwide average of 13.4 cents per kWh. Last May, electricity costs were 36.8 percent higher in Los Angeles compared to the nation. In the past five years, prices paid by Los Angeles area consumers for electricity exceeded the U.S. average by 32.4 percent or more in the month of May. (See [chart 2.](#))

Prices paid by Los Angeles area consumers for utility (piped) gas, commonly referred to as natural gas, were \$1.456 per therm, 40.4 percent more than the national average in May 2020 (\$1.037 per therm). A year earlier, area consumers paid 21.4 percent more per therm for natural gas compared to the nation. In the Los Angeles area over the past five years, the per therm cost for natural gas in May has varied between 19.0 percent and 41.3 percent above the U.S. average. (See [chart 3.](#))

The Los Angeles-Long Beach-Anaheim metropolitan area consists of Los Angeles and Orange Counties in California.

### Technical Note

Average prices are estimated from Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, 9 divisions, 2 population size classes, 8 region/size-class cross-classifications, and the 23 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm, are published. For gasoline, the average price per gallon is published. Average prices for commonly available grades of gasoline are published as well as the average price across all grades.

All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour represents the total bill divided by the kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.
