County Employment and Wages in Nevada – Third Quarter 2020

Employment fell in Nevada's two large counties from September 2019 to September 2020, the U.S. Bureau of Labor Statistics reported today. (Large counties are those with annual average employment levels of 75,000 or more in 2019.) Clark County's employment decreased 14.9 percent and Washoe County's employment decreased 6.5 percent. Regional Commissioner Chris Rosenlund noted that the over-the-year employment decrease in Clark County exceeded the national decrease of 6.8 percent. (See [table 1.](#))

Nationally, employment decreased in 355 of the 357 largest U.S. counties. Maui + Kalawao, HI, had the largest over-the-year decrease in employment with a loss of 35.4 percent. Utah, UT, experienced the largest over-the-year percentage increase in employment with a gain of 1.9 percent.

Among the two largest counties in Nevada, employment was higher in Clark County (875,900) in September 2020. Within Clark County's private industry, accommodation and food services accounted for the largest employment (177,600). Together, the two largest Nevada counties accounted for 87.1 percent of total employment within the state. Nationwide, the 357 largest counties made up 72.9 percent of total U.S. employment.

Employment and wage levels (but not over-the-year changes) are also available for the 15 counties in Nevada with employment below 75,000. Average weekly wages in these counties ranged from \$1,717 to \$849 during the third quarter of 2020. (See [table 2.](#))

Large county wage changes

Weekly wages increased 8.3 percent in Washoe County and 7.5 percent in Clark County from the third quarter 2019 to the third quarter 2020. Average weekly wages for the nation increased 7.4 percent over the year.

Among the 357 largest counties in the United States, 350 had over-the-year wage increases. Nationally, the increases in average weekly wages largely reflect substantial employment loss among lower-paid industries. Employment declines occurring in some higher-paid industries also feature significant wage increases. San Mateo, CA, had the largest percentage wage increase (+23.2 percent). Seven large counties had wage declines during the period. Ector, TX, had the largest over-the-year percentage decrease (-11.0 percent).

Large county average weekly wages

Average weekly wages in Washoe County (\$1,091) and Clark County (\$1,021) were below the national average of \$1,173 in the third quarter of 2020.

Among the largest U.S. counties, 96 reported average weekly wages above the U.S. average in the third quarter of 2020. San Mateo, CA, had the highest average weekly wage at \$2,922. Average weekly wages were at or below the national average in 261 counties. At \$697 a week, Cameron, TX, had the lowest average weekly wage.

Average weekly wages in Nevada's smaller counties

Among the 15 smaller counties in Nevada—those with employment below 75,000—4 reported average weekly wages above the national average of \$1,173. Eureka County (\$1,717) reported the highest average weekly wage among Nevada's small counties, while Lincoln County (\$849) reported the lowest average weekly wage in the state.

When all 17 counties in Nevada were considered, 3 had wages below \$899. Two counties had average weekly wages ranging from \$900 to \$999, six had wages ranging from \$1,000 to \$1,099, and six had wages at or above \$1,100. (See [chart 1](#).)

Additional statistics and other information

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit www.bls.gov/cew.

Employment and Wages Annual Averages Online features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2019 edition of this publication was published in September 2020. Tables and additional content from the 2019 edition of *Employment and Wages Annual Averages Online* are available at www.bls.gov/cew/publications/employment-and-wages-annual-averages/2019/home.htm. The 2020 edition of *Employment and Wages Annual Averages Online* will be available in September 2021.

The County Employment and Wages release for fourth quarter 2020 is scheduled to be released on Wednesday, May 19, 2021. The County Employment and Wages full data update for fourth quarter 2020 is scheduled to be released on Wednesday, June 2, 2021.

QCEW Imputation Issue Caused by Pandemic-Related Challenges

In the spring of 2020, BLS modified its imputation process for QCEW to be more responsive to current economic conditions. While continuing work to improve this process, BLS made an unintended data processing error. This error affected data for the second, third, and fourth quarters of 2020. BLS has analyzed this issue and has determined that the impact on QCEW employment was negligible at the statewide level. In smaller areas and industries revisions may be larger than usual. Wage data were not affected. Following the usual QCEW practice these data will be revised and corrected with the full data update on September 1, 2021.

For more information on QCEW imputation methodology, see www.bls.gov/cew/additional-resources/imputation-methodology.htm.

Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS Web site at www.bls.gov/cew; however, data in QCEW press releases have been revised and may not match the data contained on the Bureau's Web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Table 1. Covered employment and wages in the United States and the two largest counties in Nevada, third quarter 2020

Area	Establishments, third quarter 2020 (thousands)	Employment			Average weekly wage ⁽¹⁾			
		September 2020 (thousands)	Percent change, September 2019–20 ⁽²⁾	National ranking by percent change ⁽³⁾	Third quarter 2020	National ranking by level ⁽³⁾	Percent change, third quarter 2019–20 ⁽²⁾	National ranking by percent change ⁽³⁾
United States ⁽⁴⁾	10,561.3	138,549.5	-6.8	--	\$1,173	--	7.4	--
Nevada	87.9	1,251.0	-11.6	--	1,048	24	7.8	13
Clark	56.5	875.9	-14.9	349	1,021	207	7.5	156
Washoe	15.1	213.1	-6.5	184	1,091	159	8.3	111

Footnotes:

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from quarterly employment and pay data adjusted for noneconomic county reclassifications.

(3) Ranking does not include data for Puerto Rico or the Virgin Islands.

(4) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.

Table 2. Covered employment and wages in the United States and all counties in Nevada, third quarter 2020

Area	Employment September 2020	Average Weekly Wage(1)
