If you had any work-related deaths in 2024, please tell us on the line below where you assigned/classified each death within the list of items (M1) through (M6) provided under *Injury and Illness Types* above (e.g., “fatal case was due to injury resulting from fall” or “death resulted from respiratory conditions”) _____

Steps to estimate annual average number of employees for 2024:

Step 1:

To calculate the annual average number of employees your establishment paid during 2024, you must calculate the total number of employees your establishment paid for all periods. Add the number of employees your establishment paid in every pay period during Calendar Year 2024. Count all employees that you paid at any time during the year and include full-time, part-time, temporary, seasonal, salaried, and hourly workers. Note that pay periods could be monthly, weekly, bi-weekly, etc.

Example:

Acme Construction paid its employees in 12 pay periods during 2024:

<u>Pay Period</u>	<u>Number of Employees Paid</u> <u>Per Pay Period</u>
1	30
2	0
3	35
4	37
5	37
6	40
7	43
8	42
9	37
10	35
11	30
12	<u>+26</u>
392 (total number of employees paid over all pay periods)	

Step 2:

Divide the total number of employees (from Step 1) by the number of pay periods your establishment had in 2024. Be sure to count any pay periods when you had no (zero) employees.

Example:

Acme Construction had 12 pay periods and paid a total of 392 employees during these pay periods.

392 divided by 12 = 32.67

Step 3:

Round the answer you computed in Step 2 to the next highest whole number. Write that number in the box for Section 1, Question 2 on the previous page.

Example:

Acme would round 32.67 to 33.

Steps to estimate total hours worked by all employees for 2024:

Step 1:

Determine the number of full-time employees at your establishment.

Example:

Of Acme's 33 employees in 2024, 28 were full-time.

Step 2:

Determine the number of hours generally worked by a full-time employee for a year. Multiply the number of full-time employees you calculated in Step 1 by this number. This total number of full-time hours worked should exclude vacation, sick leave, holidays, and any other non-work time.

Example:

Each of Acme's 28 full-time employees worked an average of 2,000 hours per year after excluding vacation, sick leave, holidays, and other non-work time. This works out to 40 hours per week for 50 weeks of the year.

28 full-time employees
X 2,000 hours per year
 56,000 total full-time hours

Step 3:

Determine the number of hours of overtime worked by your full-time employees.

Determine the number of regular hours worked by your non-full-time employees. (Non-full-time employees include part-time, seasonal, and temporary employees.)

Add these numbers to the number you calculated in Step 2 above. This is the estimated number of hours worked by all of your employees, full-time and non-full-time, during 2024. Write this number in Section 1, Question 3 on the previous page.

Example:

Acme's 28 full-time employees worked a total of 2,800 hours of overtime during 2024 and 56,000 regular hours. Acme's 5 part-time employees worked a total of 2,716 hours during 2024.

56,000 full-time hours from Step 2
 2,800 over time hours
+ 2,716 part-time hours
 61,516 total hours worked

Section 3: Reporting Cases

Instructions:

1. If you had **NO** cases with days away from work (Column H) and **NO** cases with days of job transfer or restriction (Column I), please proceed to Section 4: Contact Information.
2. If you had cases with days away from work (Column H) or cases with days of job transfer or restriction (Column I), please complete Section 3. To identify the individual cases to report, follow these steps:

Step 1: Go to your completed OSHA Form 300.

Note each case that has a check in Column (H) or Column (I).

These are the only cases you should report.

See the illustration in Step 3 below.

Step 2: Fill out one Injury and Illness Case Form for each case that you identified in Step 1. You can find most of the information on a supplementary document such as the *Injury and Illness Incident Report* (OSHA Form 301), a workers' compensation report, an accident report, or an insurance form.

Step 3: If more than one establishment is noted on the front cover under "Report for this Location," be sure to look at all your OSHA Form 300's to find which cases to report.

Log of Work-Related Injuries and Illnesses

You must record information about every work-related death and about every work-related injury or illness that involves loss of consciousness, restricted work activity or job transfer, days away from work, or medical treatment beyond first aid. You must also record significant work-related injuries and illnesses that are diagnosed by a physician or licensed health care professional. You must also record work-related injuries and illnesses that meet any of the specific recording criteria listed in 29 CFR Part 1904.8 through 1904.12. Feel free to use two lines for a single case if you need to. You must complete an Injury and Illness Incident Report (OSHA Form 301) or equivalent form for each injury or illness recorded on this form. If you're not sure whether a case is recordable, call your local OSHA office for help.

Attention: This form contains information relating to employee health and must be used in a manner that protects the confidentiality of employees to the extent possible while the information is being used for occupational safety and health purposes.
