

Cross-cutting topic
International trade in services by
mode of supply

The 36th Voorburg Group Meeting
20th-23rd September, 2021

Agnieszka Matulska-Bachura
Trade and Services Department

Plan of presentation

- Introduction
- Concept of international supply of services by modes
- Data sources
- Procedure for compiling data on the export of services by MoS 1, 2, 3 and 4
- Procedure for compiling data on the import of services by modes of supply 1, 2, 3 and 4
- International trade in services by modes of supply – experimental results
- Challenges

Introduction

The experiences of the Statistics Poland in compiling information on the international supply of services by modes of supply result from:

- projects performed under the grant agreements with the European Commission:
 - ✓ *International trade in services* - no of agreements: 826274-2018-PL-B2773-ITS and 879398-2019-PL-B244476-ITS),
 - ✓ *EBS Regulation (EU) 2019/2152 Implementation: Methodology and new data requirements (previously FRIBS Regulation)* - no of agreement 101022360-2020-PL-B5640-EBS as well as
- participation in the works of the *Working Group on International Trade in Services statistics* (ITSS) or the Task Force on MoS.

Concept of international supply of services by modes

INTERNATIONAL TRADE IN SERVICES

services transactions between residents and non-residents comprised by balance of payment statistics

+

services supplied through the operations of foreign affiliates:
IFATS and OFATS

+

distributive services

-

goods

INTERNATIONAL SUPPLY OF SERVICES

Concept of international supply of services by modes

Export of services:

- ① services provided to non-residents under the MoS 1, 2 and 4
- ② distributive services provided to non-residents due to the export of goods
- ③ services provided to non-residents through the commercial presence (mode 3)

Import of services:

- ① services purchased from non-residents under MoS 1, 2 and 4
- ② services provided to Polish residents through the commercial presence (mode 3)

Data source:

- International trade in services survey
- Annual business survey of enterprises
- Activity of enterprises owning the shares in entities located abroad
- Foreign Trade in Goods Statistics
- International trade in services by modes of supply - pilot survey

Procedure for compiling data on the export of services by MoS 1, 2, 3 and 4

1

Compiling data on value of services provided to non-residents under the MoS 1, 2 and 4 (component ① for export side)

2

Estimating value of distributive services provided to non-residents due to the export of goods (component ② for export side)

3

Preparing data on value of services supplied through the commercial presence (mode 3) (component ③ of export side)

4

Compiling data on export of services by modes of supply 1, 2, 3 and 4

Procedure for compiling data on the import of services by MoS 1, 2, 3 and 4

1

Compiling data on value of services purchased from non-residents under the MoS 1, 2 and 4 (component ① for import side)

2

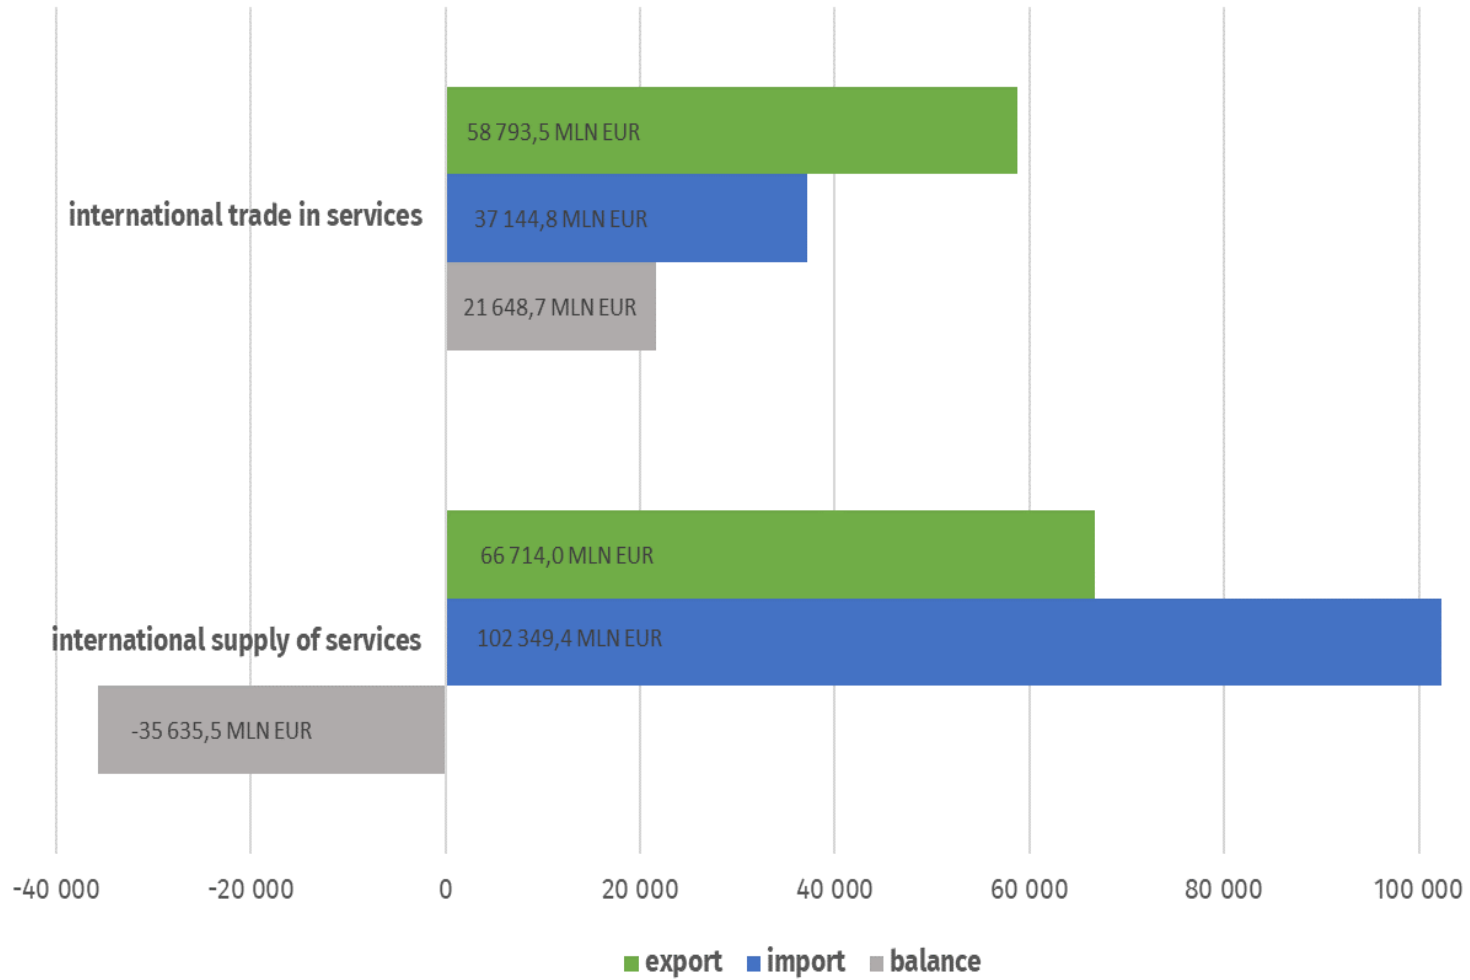

Preparing data on value of services provided to Polish residents by INFATS (MoS 3) (② component of import side)

3

Compiling data on import of services by modes of supply 1, 2, 3 and 4

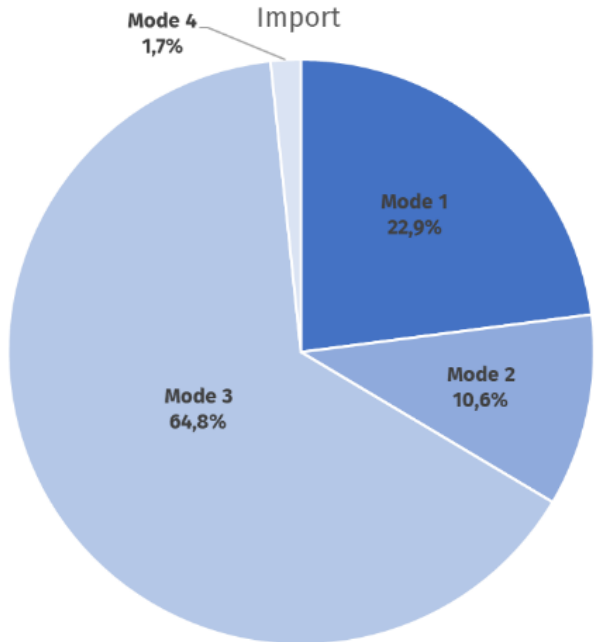

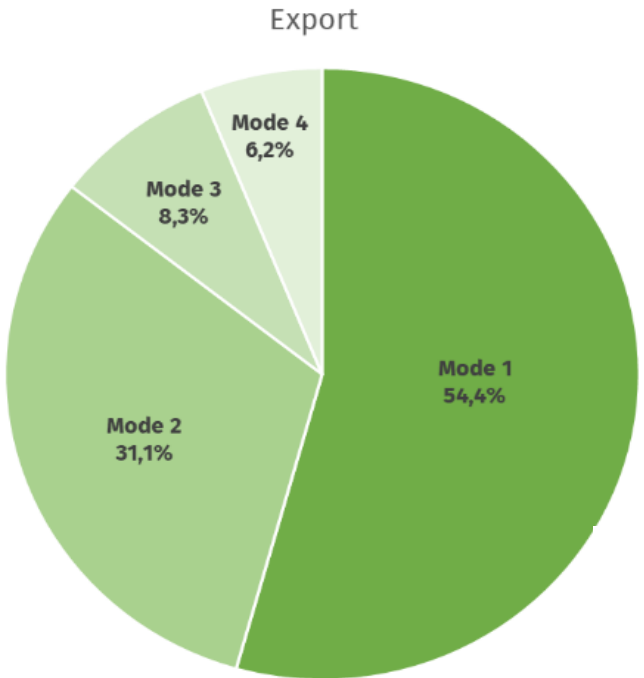

International trade in services by modes of supply – experimental results

Figure 1 Export, import and balance of trade for international trade in services and international supply of services in Poland in 2018

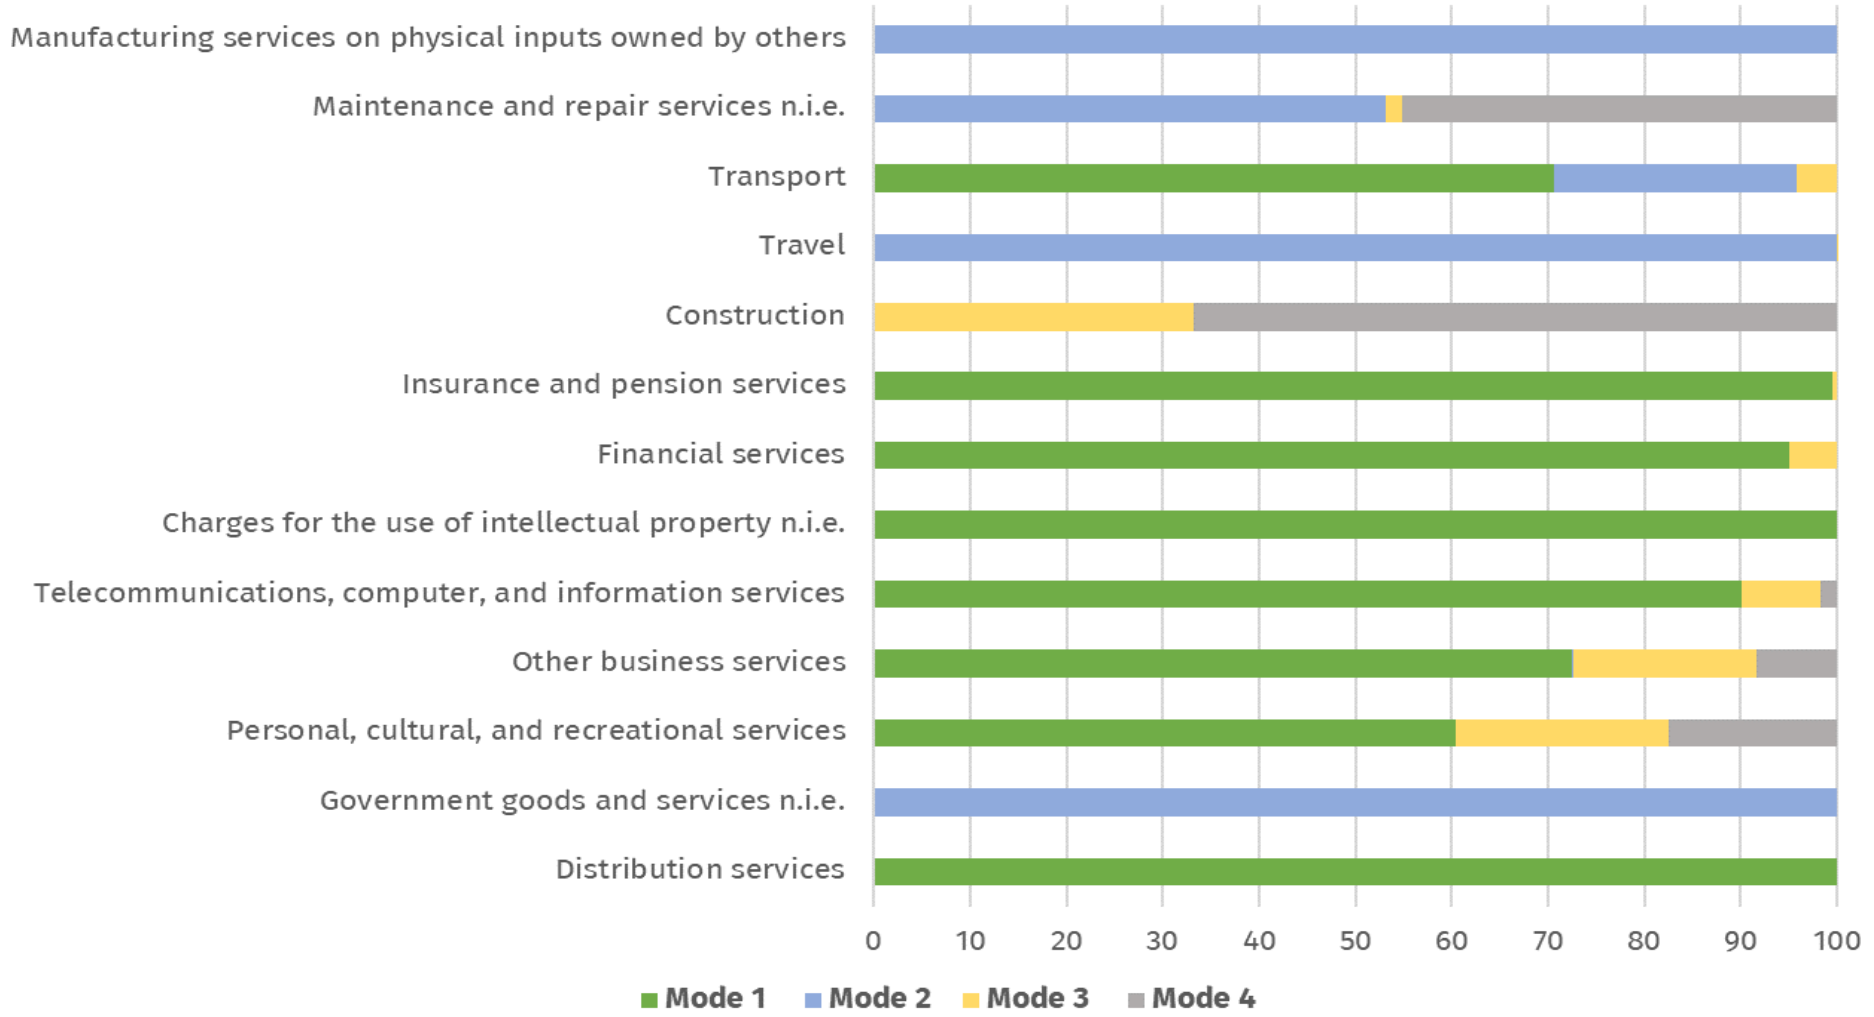

International trade in services by modes of supply – experimental results

Figure 2 Structure of international trade in services by modes of supply in Poland in 2018

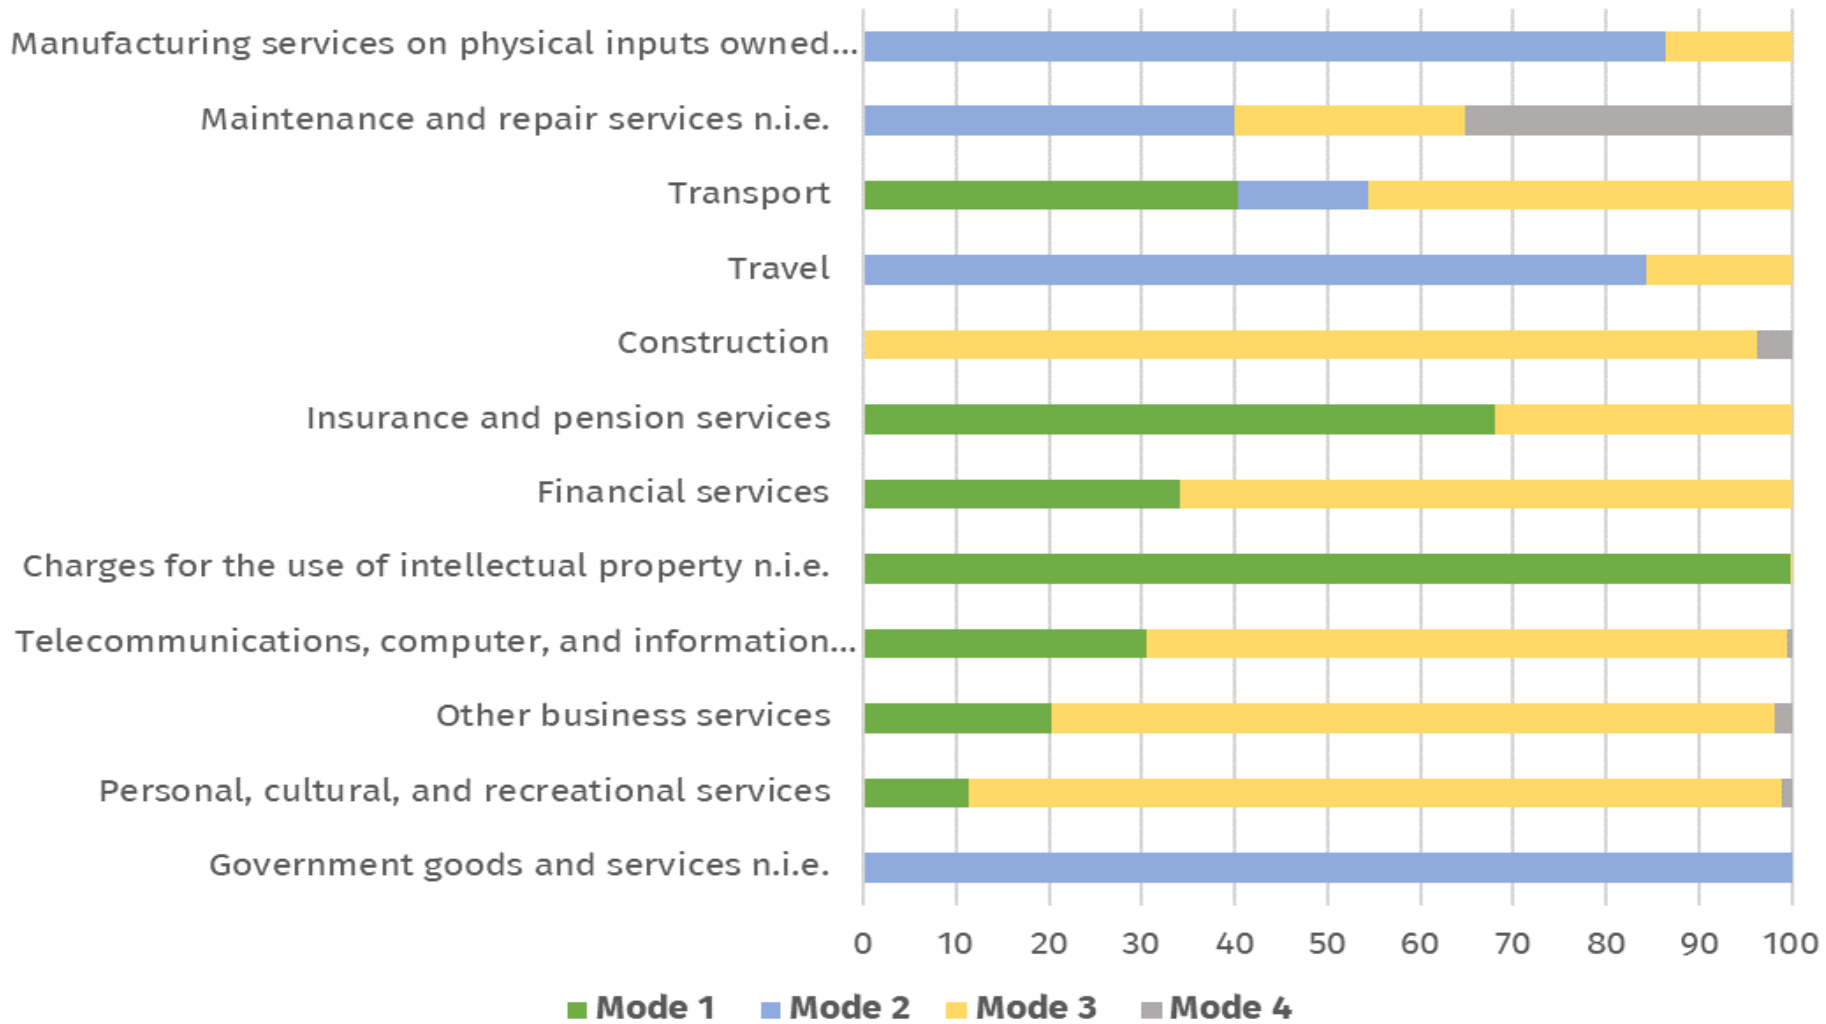

International trade in services by modes of supply – experimental results

Figure 3 Structure of export by modes of supply for 12 main EBOPS services items in 2018

International trade in services by modes of supply – experimental results

Figure 4 Structure of import by modes of supply for 12 main EBOPS services items in 2018

Challenges:

- Excluding the value of goods from the services transaction recorded in the services account of balance of payment
- Improving the method used for establishing the type of services supplied by commercial presence as well as their value
- Developing the method for estimating the share of service supplied by each mode
