¹ Includes defined benefit pension plans and defined contribution retirement plans. Workers are considered as having access or as participating if they have access to or are participating in at least one of these plan types.

² Includes workers in private industry and state and local government. See the Handbook of Methods: National Compensation Measures at www.bls.gov/opub/hom/ncs/home.htm for further explanation.

³ The take-up rate is calculated from the unrounded percentage of workers with access to a plan and who participate in the plan.

⁴ Surveyed occupations are classified into wage categories based on the average wage for the occupation, which may include workers with earnings both above and below the threshold. The categories were formed using percentile estimates generated using data from the National Compensation Survey publication, Employer Costs for Employee Compensation.

NOTE: Dash indicates no workers in this category or data did not meet publication criteria. For definitions of major plans, key provisions, and related terms, see the "Glossary of Employee Benefit Terms" at www.bls.gov/ncs/ebs/national-compensation-survey-glossary-of-employee-benefit-terms.htm.

¹ Includes workers in private industry and state and local government. See the Handbook of Methods: National Compensation Measures at www.bls.gov/opub/hom/ncs/home.htm for further explanation.

² Surveyed occupations are classified into wage categories based on the average wage for the occupation, which may include workers with earnings both above and below the threshold. The categories were formed using percentile estimates generated using data from the National Compensation Survey publication, Employer Costs for Employee Compensation.

NOTE: Dash indicates no workers in this category or data did not meet publication criteria. For definitions of major plans, key provisions, and related terms, see the "Glossary of Employee Benefit Terms" at www.bls.gov/ncs/ebs/national-compensation-survey-glossary-of-employee-benefit-terms.htm.

¹ Includes workers in private industry and state and local government. See the Handbook of Methods: National Compensation Measures at www.bls.gov/opub/hom/ncs/home.htm for further explanation.

² The take-up rate is calculated from the unrounded percentage of workers with access to a plan and who participate in the plan.

³ Surveyed occupations are classified into wage categories based on the average wage for the occupation, which may include workers with earnings both above and below the threshold. The categories were formed using percentile estimates generated using data from the National Compensation Survey publication, Employer Costs for Employee Compensation.

NOTE: Dash indicates no workers in this category or data did not meet publication criteria. For definitions of major plans, key provisions, and related terms, see the "Glossary of Employee Benefit Terms" at www.bls.gov/ncs/ebs/national-compensation-survey-glossary-of-employee-benefit-terms.htm.
