

Household and payroll survey employment

Seasonally adjusted, 1994–2017

Numbers in thousands

Note: The historical household survey data shown here are a research series that has been smoothed for population control adjustments. The adjusted household survey data are a research series that has been adjusted to an employment concept more like the payroll survey's and smoothed for population control adjustments. More information about these research series is available at www.bls.gov/web/empsit/ces_cps_trends.htm#appendix. Shaded areas represent recessions as determined by the National Bureau of Economic Research (NBER). P = preliminary.
