Bulletin 2032

Preface

This bulletin, an annual feature of the Bureau of Labor Statistics since 1941, provides a detailed statistical presentation of work stoppages in 1977. Appendix A provides a historical record by industry group.

Preliminary estimates of the level of strike (or lockout) activity for the United States as a whole are issued about 30 days after the end of the month of reference and are available on request. Preliminary estimates for the entire year are available at year end; selected final tabulations are issued in the early summer of the following year. The methods used to prepare work stoppage statistics are described by appendix B.

The Bureau wishes to acknowledge the cooperation of employers and employer associations, labor unions, the Federal Mediation and Conciliation Service, and various State agencies.

The bulletin was prepared by Marcy Freedman in the Division of Industrial Relations, Office of Wages and Industrial Relations.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics and cite *Analysis of Work Stoppages, 1977*, Bulletin 2032.

Work Stoppages, 1977

Summary

The three major measures of strike activity—the number of strikes, workers, and days idle—declined from 1976. The number of strikes was, nevertheless, the fifth highest reported during the past 50 years. Some 5,506 stoppages began during the year, compared to 5,648 the previous year. The number of workers participating in strikes in 1977 declined by 16 percent, to 2.0 million; they made up about 2.4 percent of the total work force, down from 3.0 percent the year before. Idleness declined from 37.9 to 35.8 million days and the percent of estimated working time lost due to strikes was 0.17 percent (1.7 days idle per thousand), down from 0.19 percent in 1976.

A larger number of strikes occurred during contract renegotiations in 1977 than in 1976, reflecting increased bargaining during the year. More than eight-tenths of these stoppages involved economic issues.

Duration

Strikes tended to be longer in 1977 than in previous years (table 1). The average duration of strikes was 29 days, the highest recorded by the Bureau since data were first collected in 1927. Just under half the strikes (48.4 percent) in 1977 lasted 14 days or longer, while in 1976 half the strikes ended by the eleventh day.

About one-fifth of the strikes that ended in 1977 lasted between 14 days and a month (table 3); almost one-third of these strikes were in wholesale and retail trade, contract construction, and nonelectrical machinery (table 25).

Mining disputes accounted for about three-fifths of the strikes that were shorter than 4 days. Between 1976 and 1977, strikes in the 1- to 3-day category declined by 438, 411 of which were in the mining industry.

Size

Following a historical pattern, about half of the strikes involved fewer than 100 workers (table 6). Strikes in the nonmanufacturing sector were smaller than those in manufacturing. For instance, almost two-thirds of the strikes involving fewer than 20 workers occurred in nonmanufacturing industries—primarily in construction and wholesale and retail trade.

Most of the smaller disputes occurred in nonmanufacturing industries; so did most major disputes (those involving 10,000 workers or more). The bulk of these walkouts were in mining—8 out of 14.

Major stoppages were not as frequent as in many earlier years (table 4). Between 1976 and 1977 the number dropped from 23 to 18 (table 5). Major stoppages accounted for far fewer days idle in 1977—9.9 million days compared with 14.0 million days in 1976. All of the major stoppages in 1977 lasted at least a week, but in 1976 a third of the major stoppages were shorter (table 3).

Major Issue

Economic issues continued to be the most important, accounting for three-fifths of the strikes that began in the year (table 11.). They include general wage changes, supplementary benefits, wage adjustments, and hours of work. Except for 1974, economic issues were key points of contention in a larger proportion of strikes in 1977 than in any year since 1961. Fewer workers were involved in these disputes than in most previous years, however. Most of the economic disputes (more than nine-tenths) involved general wage issues.

Plant administration issues were the second major cause of strikes, largely because of a large number of disputes in coal mining (table 12). Most of the idleness from plant administration disputes this year resulted from the walkout of 170,000 coal miners after the United Mine Workers contract expired in December.

Among the major stoppages in 1977, 10 involved economic issues, 5 involved administration issues, and 1 involved working conditions. The longshore dispute arose over the handling of containerized cargo which posed a threat to job security.

Monthly pattern

Strike indices are influenced by the timing of contract negotiations. About two-thirds of the workers whose contracts expired in 1977 had agreements which terminated between March and September;¹ similarly, two-thirds of the strikers walked out during this period.

Idleness peaked in December because the major bituminous coal strike began in this month. But the number of strikes was lowest in December, continuing a pattern that has been observed since 1950.

Contract status

As usual, most strikes (59 percent) occurred after the expiration or reopening of an agreement (table 10).

¹Wage Calendar 1977, Bulletin 1943, (Bureau of Labor Statistics, 1977), p.1.

While strikes in general declined slightly, renegotiation disputes increased, and economic issues accounted for a larger proportion of these strikes (86 percent) than of all strikes (61 percent).

The next largest group of strikes occurred during the term of agreement, with 65 percent occurring over administration issues in the coal industry. A substantial increase in strikes occurred at firms where no contracts were in effect (from 59 in 1976 to 129 in 1977); strikes involving union organization and security matters were responsible for this jump.

Among the major stoppages in 1977, all but the 1977-78 coal strike occurred during the contract term. The other major strikes occurred after contract negotiations failed.

Union affiliation

Unions affiliated with the AFL-CIO called 55 percent of the strikes in 1977, compared with 39 percent for unaffiliated unions, and 3 percent for professional employee associations. Idleness among AFL-CIO affiliates was almost twice that among nonaffiliates. However, six major strikes in the bituminous coal industry accounted for 40 percent of the idleness among nonaffiliates.

Strike activity among AFL-CIO affiliates has declined relative to nonaffiliates since 1965, but affiliated unions have initiated at least half of the strikes in each year. These strikes involved over half of the workers who struck each year until 1976, when they involved only 40 percent of the workers. In 1977 the proportion of workers rose to 47 percent.

The role of unaffiliated unions increased during these same years. Although the number of strikes, workers, and days idle among nonaffiliates declined in 1977, strike activity remained well above that of the sixties, in absolute and relative terms.

Professional employee associations have also increased their involvement in recent years. The proportion of strikes initiated by professional associations ranged from 1.2 percent to 2.5 percent during the 1966-69 period and from 2.2 percent to 5.0 percent during the 1970-77 period.

Industry

Four industries accounted for 50 percent of the strike-related idleness during 1977 (table 14). In order of days lost, these industries were mining, transportation equipment, contract construction, and nonelectrical machinery.

The disproportionately high idleness levels in mining stemmed from the timing of contract negotiations in the coal and copper industries, and from a large number of major stoppages in coal. The December coal strike was the largest of the major stoppages in 1977. More than 3 million days were lost during the 1977 portion of that

strike. Major issues still unsettled at the time the strike began included the Bituminous Coal Operators Association's demand that fines be levied on workers engaging in wildcat strikes and union demands for the right to strike over local grievances.²

In transportation equipment, days idle were boosted by two major stoppages in the aerospace industry. In addition, there were numerous short stoppages in the motor vehicle and equipment industry, and longer stoppages in shipbuilding and repairing. Idleness was slightly below the 1976 level, but higher than in the five preceding years (appendix A).

In construction, although nearly half of the workers in major collective bargaining units (1,000 workers or more) were covered by contracts which expired in 1977,³ the number of strikes in this usually strike-prone industry declined for the third year in a row. The proportion of estimated working time lost to strikes was the lowest since 1963, the result, perhaps, of employment gains by nonunion firms. Unions kept their demands moderate and in some areas even agreed to cuts in compensation in an effort to reduce unemployment among their members.⁴ Major stoppages in the industry fell to 3, from a high of 11 in 1974 (table 6).

Despite heavy bargaining schedules, significantly fewer workers in the transportation, communication, electric, gas, and sanitary services group struck than in previous years, bringing the proportion of estimated working time lost in these industries to the lowest level since 1964 (appendix A). Nine-tenths of these workers struck during contract renegotiations (table 9).

Occupation

As in the past, production and maintenance workers, who are the most highly unionized, were involved in more strikes than other occupational groups (table 15). Only in the government sector were professional and technical employees well represented among strikers.

All three major strike measures for professional and technical workers fell in 1977 for the second consecutive year. Among professional and technical workers in government, the decline was due to decreased strike activity among teachers (table 19). Between 1976 and 1977, the number of teacher disputes declined by 20 percent, teachers on strike by 16 percent, and days idle by 15 percent.

Location

Pennsylvania continued to experience more strikes than any other State, while West Virginia had the largest

²National Emergency Disputes Under the Taft-Hartley Act, 1947-77, Report 542 (Bureau of Labor Statistics, 1978), appendix B, pp. 6-14.

³Wage Calendar 1977, p.3.

⁴Leon Bornstein, "Industrial Relations in 1977: Highlights of Key Developments", *Monthly Labor Review*, Feb. 1978, pp. 30-31.

number of workers involved, and Ohio and Pennsylvania had the most days idle (table 21). Production and maintenance workers called nine-tenths of the strikes in these States (table 22).

One-third of all days idle resulted from stoppages in Region V, which includes Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin. None of the States had fewer than 100 strikes. Seven-tenths of the idleness in Michigan during the year resulted from the major iron ore strike in August. Strikes in government accounted for a third of Wisconsin's idleness, while strikes in nonelectrical machinery and mining boosted idleness in the other States in the region.

The proportion of working time lost (the idleness rate) was higher in West Virginia (Region III) than in any other State--and three times the rate for the States of Washington (Region X) and Kentucky (Region IV), which were next in line. Miners made up nine-tenths of the workers who struck in West Virginia.

Six metropolitan areas, one more than in 1976, experienced over 100 stoppages: Detroit (153), Pittsburgh (135), Chicago (132), Los Angeles-Long Beach (128), New York City (128) and Philadelphia (126) (table 24). These areas were also among the highest in workers and days idle. Los Angeles-Long Beach and Seattle-Everett were the only metropolitan areas to incur more than a million days of idleness.

Type of settlement

Three-fourths of the stoppages ended with either a formal settlement or an established procedure for handling the remaining differences (table 31). More than half of the stoppages that ended without a formal settlement were short protest or sympathy disputes, and almost all of these--96 percent--involved miners.

Formal agreements resolved all issues in more than eight-tenths of the economic disputes, compared with four-tenths in noneconomic disputes (table 30). A large number of the noneconomic disputes were in mining,

where disputes often were not formally resolved.

Nine-tenths of the renegotiation disputes and over eight-tenths of the stoppages during initial contract bargaining ended in formal settlements (table 29). More than half of the strikes during the contract term were short protest or sympathy disputes which resulted in no formal settlement.

Impasse procedures

A number of approaches have been used in dealing with collective bargaining impasses; typically these involve the use of outside parties.

In 1977, mediation was used in half the disputes (table 28). Of these, government agencies mediated 96 percent. Numerous governmental agencies have been established for this purpose at the Federal, State, and local levels. In a small number of cases the combined resources of the Federal and State governments were brought into play.

As in prior years, strikes that took place during contract renegotiations were more likely to involve mediation than those that occurred during initial contract bargaining or during the contract term. Mediation was used in 69 percent of the renegotiation disputes.

Workers terminated 504 strikes with the understanding that unresolved issues would be handled at a later date in ways agreed upon by the parties. Information was available for 356 of these strikes. Direct negotiations were agreed to in 26 percent of the cases and referral to a government agency in 24 percent.

In disputes stemming from the negotiation of a first agreement or the attempt of a union to gain recognition, direct negotiations were requested in just over half of the settlements. In renegotiation disputes, settlements provided for direct negotiations a little less than half the time. Other means were most frequently employed to resolve mid-contract disputes; only one-fourth of these settlements called for direct negotiations.

1977.....	5,506	29.3	14	2,040	2.4	35,822	.17	17.6	

¹ The number of stoppages and workers relate to stoppages beginning in the year; average duration, to those ending in the year. Days of idleness include all stoppages in effect. Workers are counted more than once if they were involved in more than 1 stoppage during the year.

Available information for earlier periods appears in *Handbook of Labor Statistics, 1978 Reference Edition*, BLS Bulletin 2000 (1979), tables 151-56. For a discussion of the procedures involved in the collection and compilation of work stoppage statistics, see BLS *Handbook of Methods*, BLS Bulletin 1910 (1976), chapter 27.

² Figures are simple averages; each stoppage is given equal weight regardless of its size.

³ Agricultural and government employees are included in the total employed and total working time; private household, forestry, and fishery employees are excluded. An explanation of the measurement of idleness as a percentage of the total employed labor force and of the total time worked is found in "Total Economy Measure of Strike Idleness," *Monthly Labor Review*, Oct. 1968.

⁴ Not available.

Table 5. Work stoppages involving 10,000 workers or more, beginning in 1977

Beginning date	Approximate duration (calendar days) ¹	Establishment(s) and location(s)	Union(s) involved ²	Approximate number of workers involved ³	Major terms of settlement ⁴
Feb. 8	31	Bituminous Coal Industry—West Virginia and Virginia	United Mine Workers of America (Ind.)	21,000	Miners protested dismissal of miner from safety committee and the companies' sick leave policies. Union officials persuaded the miners to return to work.
Feb. 14	17	Bituminous Coal Industry—Illinois and Indiana	United Mine Workers of America (Ind.)	12,500	Miners protested companies' policies on absenteeism. The companies agreed to follow the policy as set forth in the 1974 National Agreement specifying that miners can be discharged for absenteeism only if they miss 2 consecutive days without a proven illness.
Mar. 6	21	Philadelphia Food Stores Labor Relations Council (formerly Philadelphia Food Stores Employers' Council)—Eastern Pennsylvania, Southern New Jersey, and Delaware	Amalgamated Meat Cutters and Butcher Workmen of North America; Retail Clerks International Union	14,900	3-year agreement negotiated on Mar. 26, 1977, providing for 45-cent wage increases on Mar. 5, 1978 and Mar. 4, 1979; cost-of-living clause revised to provide unlimited adjustments of 1 cent for each 0.4 point-rise in the BLS-CPI in September of 1977, 1978, and 1979; Sunday premium reduced to double-time from double-time-and-a-half and Saturday night premium reduced to time-and-a-half from double time; increased pension to monthly payment of \$15 per year of service (was \$12); established automatic retirement with full benefits after 30 years' service; improved Blue Shield coverage; established vision care plan and drug plan for part-time workers. (See <i>Current Wage Developments July 1977</i> , p. 33.)
Mar. 15	36	Bituminous Coal Industry—Ohio, Pennsylvania, and West Virginia	United Mine Workers of America (Ind.)	31,200	Miners protested companies' policies on absenteeism and alleged abuse by supervisors. Workers also wanted reinstated a miner who gave his termination notice and later changed his mind. The UMW made the absenteeism policies a national issue; the supervisor issue would be settled in court; and the miner who wanted his job back would follow the company's normal grievance procedure.
May 18	24	Ohio Contractors Association and Associated General Contractors—Ohio	Laborers' International Union of North America	25,000	3-year agreement providing for wage increases of 85 cents per year: 70 cents immediately plus 15 cents on November 1 of the 1st year, and 70 cents on May 1 plus 15 cents on November 1 in each of the following 2 years. Contractors agreed to hire local union members who are out of work before transferring workers from other areas of the State.
June 15	93	Bituminous Coal Industry—Alabama, Illinois, Indiana, Kentucky, Ohio, Pennsylvania, Virginia, West Virginia	United Mine Workers of America (Ind.)	81,300	Strike was in response to announced cutbacks in the UMW Health and Retirement Fund which would require UMW members to pay part of their hospitalization and physician costs (previously free). Coal operators refused miners' request for reallocation of money from a pension fund to the benefit funds. Strike terminated without a formal settlement.
July 1	68	Copper Mining and Refining Industry—Arizona, Maryland, Michigan, Montana, New Mexico, Nevada, Texas, Utah, Washington	United Steelworkers of America; International Brotherhood of Electrical Workers; United Brotherhood of Carpenters and Joiners of America; International Association of Machinists and Aerospace Workers; International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Ind.); United Association of Journeymen and Apprentices of the Plumbing and Pipefitting Industry of the United States and Canada; International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths,	23,500	3-year agreements providing for wage increases of 85 cents per year with additional fringe benefits and job increments based on classification; COLA; increased pension, increased life insurance from \$8,000 to \$10,000, increased major medical insurance from \$25,000 up to \$50,000, and increased accidental death insurance.

See footnotes at end of table.

Table 5. Work stoppages involving 10,000 workers or more, beginning in 1977—Continued

Beginning date	Approximate duration (calendar days) ¹	Establishment(s) and location(s)	Union(s) involved ²	Approximate number of workers involved ³	Major terms of settlement ⁴
July 1—Cont.			Forgers and Helpers; United Transportation Union; International Union of Operating Engineers		
July 3	15	State of Wisconsin—Statewide	American Federation of State, County and Municipal Employees	10,200	2-year agreement effective on Aug. 14, 1977, providing: <i>Nonprofessional employees:</i> Immediate wage increases of 7 percent or minimum of 38 cents, plus 7.5 percent or minimum of 42 cents effective July 2, 1978; weekend differentials of 15 cents on Saturdays and 20 cents on Sundays. <i>Professional employees:</i> Immediate wage increases of 6.5 percent or minimum of 38 cents, plus 7 percent or minimum of 42 cents effective July 2, 1978. <i>All employees:</i> For those not on probation or at maximum of salary range, 1/2-step automatic increase effective Jan. 1, 1978 and another 1/2-step increase Jan. 1, 1979. Subsequent to settlement, Wisconsin State legislature forced renegotiation of COLA clause. With increase of 0-6.5 percent in CPI, no COLA received; 6.6-7.5 percent, 2 cents per hour for each 0.5-point rise in CPI or fraction thereof; 7.6 percent and above, 2 cents for each 1-point rise in CPI or fraction thereof. New language prohibiting employer from changing work schedules to avoid overtime; hospital and surgical insurance completely paid for until January 1978, after that employee to pay maximum of 10 percent of premium; mileage reimbursement to 15.5 cents per mile the 1st year and 17 cents the 2d year; increased meal and hotel allowances. ⁵
July 18	7	Associated General Contractors; Building Industry Association of California—California	International Union of Operating Engineers	10,000	3-year agreement, retroactive to July 1, providing for 95-cent wage increase July 1 of each year, plus 5-cent increases in both fringe benefits and union dues in the 1st year; \$1-a-day subsistence pay increase in each of the 3 years for heavy equipment operators working away from their homes.
July 25	19	Associated General Contractors—Western and Central Washington	United Brotherhood of Carpenters and Joiners of America	14,800	4-year agreement providing for wage increases of 25 cents on Aug. 1, 1977, and \$1 on June 1 in each of the next 3 years; automatic cost-of-living clause continued, providing 7 cents per point increase in the Seattle CPI from Feb. to Feb. beyond guaranteed minimum of \$1; increased employer contribution to health and security fund to 55 cents per hour on Jan. 1, 1978 (was 50 cents). (See <i>Current Wage Developments October 1977</i> , p. 21.)
Aug. 1	138	Iron Ore Mining and Processing Industry—Michigan and Minnesota	United Steel Workers of America	14,500	Dispute over whether incentive pay was a "national" or "local" issue. The Experimental Negotiating Agreement (ENA) that regulates steel bargaining prohibits strikes over "national" issues. In early Nov., the steel industry and the union modified ENA to provide for binding arbitration of future disputes over whether issues are national or local. Then a uniform incentive plan was incorporated into contracts with each of the companies providing incentive bonuses to at least 75 percent of the employees of each ore company, beginning in November 1979. Employees eligible for incentive pay would no longer receive the 30-cent attendance bonus. Bonus would be continued for other workers employed then but not for workers hired in the future. Other local issues were resolved on the company level. (See <i>Current Wage Developments January 1978</i> , pp. 1-2.)
Aug. 15	14	Delco-Remy Division of General Motors Corp.	United Automobile, Aerospace and Agricultural Implement Workers (Ind.)	12,800	Strike over local issues. Most production speed-up cases resolved, older workers guaranteed job security, promotional and transfer rights outlined, grievances made easier to air, time to

See footnotes at end of table.

Table 5. Work stoppages involving 10,000 workers or more, beginning in 1977—Continued

Beginning date	Approximate duration (calendar days) ¹	Establishment(s) and location(s)	Union(s) involved ²	Approximate number of workers involved ³	Major terms of settlement
Aug. 15—Cont.					progress from initial job classification to the classification with most pay reduced; compromises reached on many grievances, others referred to individual companies for resolution.
Aug. 16	14	Bituminous Coal Industry—Illinois and Indiana	United Mine Workers of America (Ind.)	10,600	Miners at the Freeman United Coal Mining Co. protested the company's interpretation of an arbitration decision governing Saturday holiday pay on Christmas and New Years. Other miners honored the picket lines. As a result, some coal firms paid the holiday rate (time-and-a-half) to virtually all of their miners. Freeman and others did not pay all their miners the holiday rate. There was no formal settlement.
Sept. 15	32	Glass Packaging Institute (formerly Glass Containers Manufacturers)—Nationwide	American Flint Glass Workers' Union of North America	26,300	3-year agreement providing for 70-cent-per-hour wage increase retroactive to July 12, and additional increases of 40 cents per hour on July 1, 1978 and Sept. 1, 1979; continued COLA for up to 20 cents per hour in the 2d and 3d years, calculated at the rate of 1 cent for each 0.5-percent rise in the CPI; increased employer contributions to the pension fund and increased insurance benefits. Key issue concerning job assignment was resolved when mold workers agreed to run 2 machines simultaneously if the machine cycle was greater than 2 hours. (Management had asked for 1-hour cycle as minimum limit for simultaneous work.) (See <i>Current Wage Developments December 1977</i> , pp. 1-2.)
Oct. 1	60	Shipping Associations—East and Gulf Coast ports	International Longshoremen's Association	11,400	3-year contract providing for wage increases of 80 cents per hour in each year; increases in employer contributions to the pension and welfare funds by 54 cents and 47 cents an hour, respectively, over the term. Agreement on handling of containerized goods gave Union jurisdiction over packing and unpacking specified cargoes, and over minimum size of container crews. Guaranteed annual income levels remained a focal issue. (See <i>Current Wage Developments December 1977</i> , p. 1.)
Oct. 4	45	Boeing Co.—Kansas, Oregon, and Washington	International Association of Machinists and Aerospace Workers	21,300	34 1/2-month agreement providing for initial wage increase averaging 6.9 percent, and 3-percent increases in 2d and 3d years. \$1.04 per hour COLA incorporated into base rates; continued quarterly COLA's of 1 cent for each 0.3-point movement in BLS-CPI (1967=100); increased the number of holidays from 38 to 41 during the contract term; improved pension and insurance benefits. (See <i>Current Wage Developments December 1977</i> , pp. 1 and 14.)
Oct. 10	83	Lockheed Missle and Space Co., Inc.—California, Florida, Georgia, and South Carolina	International Association of Machinists and Aerospace Workers	18,800	3-year agreement providing for initial wage increase of 6 percent; 3-percent increases in the 2d and 3d years; quarterly COLA of 1 cent an hour for each 0.3-point movement in BLS-CPI (1967=100) continued, with the first cent of each adjustment diverted to benefit costs; improved pension funds. Number of paid holidays remained at 37 during the contract term. Seniority provisions, a major issue in negotiations, varied among plants. Management asked for increases in the length of service required for employees threatened by layoff to "bump" employees in lateral or lower rated job grades. Both parties made concessions on this issue. (See <i>Current Wage Developments January 1978</i> , p. 1.)
Dec. 6	110	Bituminous Coal Industry—Nationwide	United Mine Workers of America (Ind.)	170,300	3-year agreement ratified on March 24, providing for \$1-an-hour immediate wage increase; 70-cent wage increases in March of 1979 and 1980, each including a 30-cent guaranteed "cost-of-living" increase payable regardless of the movement in the CPI; discontinuance of COLA; guarantee of health and retirement benefits for all employees and retirees. Health benefits for employees who retired prior to Dec. 6, 1974 (and their spouses and dependents) would continue to be provided

See footnotes at end of table.

Table 5. Work stoppages involving 10,000 workers or more, beginning in 1977—Continued

Beginning date	Approximate duration (calendar days) ¹	Establishment(s) and location(s)	Union(s) involved ²	Approximate number of workers involved ³	Major terms of settlement ⁴
Dec. 6—Cont.					<p>through a health benefits fund, with employers paying into the fund at a higher rate than in 1974 (35.5 cents an hour for coal produced or purchased for resale compared with 19 cents a ton previously).</p> <p>Effective Jan. 1, 1978, active employees, those who retired or will retire on or after Dec. 6, 1974, (and spouses and dependents), to be provided health benefits directly by their employers through self-insurance or commercial carriers rather than by a common fund, unless their employers have gone or go out of business, in which case the fund will provide for them. Benefits decreased (2 cents an hour plus 1 cent per ton purchased for resale compared to the previous 88 cents per hour plus 41.7 cents per ton purchased for resale).</p> <p>Maximum deductibles for families of working miners set at \$200, and for families of retirees, \$150; no cost for hospitalization coverage; vision care plan established October 1978; sickness and accident benefits increased, in stages, to \$150 a week, from \$100.</p> <p>Maintained 2-tiered pension system, increased employer contributions to both funds, and increased pension benefits received.</p> <p>Life insurance benefits increased; wage incentive provisions established, subject to the approval of each local union.</p> <p>Strike provision the same as in 1974 contract. (See <i>Current Wage Developments April 1978</i>, pp. 1-2 and 21.)⁵</p>

¹Duration calculated from the day the first group(s) of workers are idle to the last day a group or groups of workers are idle, or to the ratification date (not the day the strikers return to work). Includes nonworkdays, such as Saturdays, Sundays, and established holidays.

²The unions listed are those directly involved in the dispute but the number of workers involved may include members of other unions or non-union workers idled by dispute in the same establishments. The unions are affiliated with the AFL-CIO, except where they are noted as independent (Ind.).

³The number of workers involved is the maximum made idle for 1 shift or longer in establishments directly involved in a stoppage. This does not measure the indirect or secondary effect on other establishments or indus-

tries whose employees are made idle as a result of material or service shortages.

⁴Information on settlement is obtained from newspaper reports unless otherwise stated. *Current Wage Developments* is published monthly by the Bureau of Labor Statistics.

⁵Source: American Federation of State, County and Municipal Employees.

⁶Most employees returned to work on March 27. About 18,000 miners stayed out, honoring picket lines at some mines set up by mine construction workers. By April 3, virtually all of the UMW miners had returned to work. The mine construction workers ratified an agreement on April 4.

¹ The number of stoppages reported for a major industry group or division may not equal the sum of its components because individual stoppages occurring in two or more groups have been counted in each. Workers involved and days idle have been allocated among the respective groups.

² Includes other finished products made from fabrics and similar materials.

³ Excludes ordnance, machinery, and transportation equipment.

⁴ Includes professional, scientific, and controlling instruments; photographic and optical goods; watches and clocks.

⁵ The situations reported here have, for statistical purposes, been deemed to fall within the Bureau's definition of a work stoppage. This decision does not constitute a legal determination that a work stoppage has taken place in violation of any law or public policy.

⁶ Fewer than 50.

NOTE: Because of rounding, sums of individual items may not equal totals. Dashes (—) denote zeros.

Table 7. Work stoppages by affiliation of unions involved, 1977

¹ The number of stoppages reported for a major industry group or division may not equal the sum of its components because individual stoppages occurring in two or more groups have been counted in each. Workers involved and days idle have been allocated among the respective groups.

² Includes other finished products made from fabrics and similar materials.

³ Fewer than 50.

⁴ Excludes ordnance, machinery, and transportation equipment.

⁵ Includes professional, scientific, and controlling instruments; photographic and optical goods; watches and clocks.

⁶ Idleness resulting from stoppage(s) beginning in prior year(s).

⁷ The situations reported here have, for statistical purposes, been deemed to fall within the Bureau's definition of a work stoppage. This decision does not constitute a legal determination that a work stoppage has taken place in violation of any law or public policy.

NOTE: Because of rounding, sums of individual items may not equal totals. Dashes (-) denote zeros.

¹ The number of stoppages reported for a major industry group or division may not equal the sum of its components because individual stoppages occurring in two or more groups have been counted in each. Workers involved and days idle have been allocated among the respective groups.

² Includes other finished products made from fabrics and similar materials.

³ Fewer than 30.

⁴ Excludes ordnance, machinery, and transportation equipment.

⁵ Includes professional, scientific, and controlling instruments; photographic and optical goods; watches and clocks.

⁶ Idleness resulting from stoppage(s) beginning in prior year(s).

⁷ The situations reported here have, for statistical purposes, been deemed to fall within the Bureau's definition of a work stoppage. This decision does not constitute a legal determination that a work stoppage has taken place in violation of any law or public policy.

NOTE: Because of rounding, sum of individual items may not equal totals. Dashes (-) denote zeros.

Table 14. Work stoppages by industry, 1977—Continued

(Workers and days idle in thousands)

Industry group	Stoppages beginning in year			Days idle during year (all stoppages)	
	Number	Mean duration (days) 1/	Workers involved	Number	Percent of est. total working time 2/
Industrial inorganic and organic chemicals.	41	55.4	7.4	329.0	
Plastics materials and synthetic resins, synthetic rubber, and other man-made fibers, except glass.....	27	23.2	3.7	78.3	
8	61.1	.4	16.2		
Drugs.....					
Soap, detergents, and cleaning preparations, perfumes, cosmetics, and other toilet preparations.....	7	80.9	.7	37.6	
Paints, varnishes, lacquers, enamels, and allied products.....	10	38.5	1.0	24.2	
Gum and wood chemicals.....	3	17.5	.3	4.2	
Agricultural chemicals.....	5	48.1	.5	16.8	
Miscellaneous chemical products.....	11	46.1	5.3	129.7	
Petroleum refining and related industries.....	23	38.2	6.3	172.3	0.33
Petroleum refining.....	14	39.5	5.8	157.6	
Paving and roofing materials.....	8	23.5	.5	14.0	
Miscellaneous products of petroleum and coal.....	1	23.0	(4)	.7	
Rubber and miscellaneous plastics products.....	88	31.3	14.7	343.4	.20
Tires and inner tubes.....	14	16.3	6.0	76.2	
Reclaimed rubber.....	2	57.0	.1	4.7	
Fabricated rubber products not elsewhere classified.....	20	21.9	2.1	50.4	
Miscellaneous plastics products.....	52	47.1	6.4	211.6	
Leather and leather products.....	19	55.3	6.9	259.0	.39
Leather tanning and finishing.....	5	15.3	.9	10.0	
Industrial leather belting and packing.....	-	-	-	-	
Boot and shoe cut stock and findings.....	2	45.5	.8	26.8	
Footwear, except rubber.....	7	73.1	4.1	210.4	
Leather gloves and mittens.....	-	-	-	-	
Luggage.....	2	4.2	.3	1.1	
Bandages and other personal leather goods.....	2	2.2	.2	.5	
Leather goods not elsewhere classified.....	1	-	.5	10.1	
Stone, clay, and glass products.....	139	28.8	44.8	987.8	.60
Flat glass.....	-	-	-	-	
Glass and glassware, pressed or blown.....	12	26.7	28.2	515.3	
Glass products, made from purchased glass.....	8	10.3	1.2	10.3	
Cement, hydraulic.....	2	68.0	.3	20.8	
Structural clay products.....	8	44.6	.7	12.1	
Pottery and related products.....	8	34.0	1.3	57.9	
Concrete, gypsum, and plaster products.....	73	78.1	6.7	107.7	
Cut stone and stone products.....	3	18.8	.1	1.6	
Abrasives, asbestos, and miscellaneous nonmetallic mineral products.....	25	58.3	5.5	261.9	
Primary metal industries.....	239	26.7	90.6	2,166.8	.71
Blast furnaces, steel works, and rolling and finishing mills.....	51	29.8	12.6	373.0	
Iron and steel foundries.....	67	22.1	22.4	462.7	
Primary smelting and refining of nonferrous metals.....	12	32.5	25.1	540.7	
Secondary smelting and refining of nonferrous metals.....	9	39.7	1.0	34.3	
Rolling, drawing, and extruding of nonferrous metals.....	42	26.2	10.8	438.5	
Nonferrous foundries.....	43	15.3	15.7	210.0	
Miscellaneous primary metal products.....	15	49.0	3.1	107.6	
Fabricated metal products, except ordnance, machinery, and transportation equipment.....	354	23.7	57.2	1,466.0	.40
Metal cans.....	14	24.1	2.9	59.8	
Cutlery, handtools, and general hardware.....	34	24.9	7.6	138.5	
Heating apparatus (except electric) and plumbing fixtures.....	22	25.0	4.8	143.9	
Fabricated structural metal products.....	150	31.8	21.1	567.4	
Screw machine products, bolts, nuts, screws, and rivets.....	17	29.0	2.6	54.1	
Metal stampings.....	39	21.6	8.0	178.8	
Coating, engraving, and allied services.....	27	29.3	1.7	59.1	
Miscellaneous fabricated wire products.....	12	39.3	2.0	54.0	
Miscellaneous fabricated metal products.....	39	41.0	6.6	210.4	
Machinery, except electrical.....	451	28.4	139.6	3,266.9	.59
Engines and turbines.....	51	16.7	24.1	329.1	
Farm machinery and equipment.....	30	22.3	30.5	477.2	
Construction, mining, and materials handling machinery and equipment.....	68	32.5	24.2	601.0	
Metalworking machinery and equipment.....	73	39.6	14.6	569.2	
Special industry machinery, except metalworking machinery.....	60	37.6	8.9	271.3	
General industrial machinery and equipment.....	82	32.1	19.7	550.0	
Office, computing, and accounting machines.....	4	33.9	2.0	50.2	
Service industry machines.....	36	19.7	9.4	188.7	
Miscellaneous machinery, except electrical.....	51	52.6	5.9	230.3	
Electrical machinery, equipment, and supplies.....	199	17.2	76.2	1,076.3	.22
Electric transmission and distribution equipment.....	41	7.5	20.0	149.7	
Electrical industrial apparatus.....	54	7.2	14.8	121.2	
Household appliances.....	20	42.9	9.1	312.4	
Electric lighting and wiring equipment.....	31	30.8	7.2	159.2	
Radio and television receiving sets, except communication types.....	8	25.4	1.0	23.2	
Communication equipment.....	14	18.9	2.6	16.1	
Electronic components and accessories.....	19	32.1	4.8	102.2	
Miscellaneous electrical machinery, equipment, and supplies.....	12	16.2	16.7	192.2

State.....	44	8.1	33.7	181.9	
County.....	73	20.7	24.0	264.3	
City.....	192	16.2	72.0	864.7	
Special district.....	102	15.7	40.2	454.3	

¹ Mean duration is calculated only for stoppages ending in the year, and is weighted by multiplying the duration of each stoppage by the workers involved.

² See footnote 3, table 1.

³ The number of stoppages reported for a major industry group or division may not equal the sum of its components because individual stoppages occurring in two or more groups have been counted in each. Workers involved and days idle have been allocated among the respective groups.

⁴ Fewer than 50.

⁵ Idleness due to stoppage(s) beginning in prior year(s).

* The situations reported here have, for statistical purposes, been deemed to fall within the Bureau's definition of a work stoppage. This decision does not constitute a legal determination that a work stoppage has taken place in violation of any law or public policy.

NOTE: Because of rounding, sums of individual items may not equal totals. Dashes (-) denote zeros.

¹ The situations reported here have, for statistical purposes, been deemed to fall within the Bureau's definition of a work stoppage. This decision does not constitute a legal determination that a work stoppage has taken place in violation of any law or public policy.

² Fewer than 50.

counted in each. Workers and days idle have been allocated among the respective groups.

³ Fewer than 50.

NOTE: Because of rounding, sums of individual items may not equal totals. Dashes (-) denote zeros.

¹ The situations reported here have, for statistical purposes, been deemed to fall within the Bureau's definition of a work stoppage. This decision does not constitute a legal determination that a work stoppage has taken place in violation of any law or public policy. Stoppages extending across State lines have been counted separately in each State affected; workers involved and days idle were allocated among the States.

² Excludes strike(s) where there is no union.

³ Fewer than 50.

NOTE: Because of rounding, sums of individual items may not equal totals. Dashes (-) denote zeros.

¹ Stoppages extending across State lines are counted separately in each State affected; workers involved and days idle were allocated among the States.² Excludes private household workers.³ Mean duration is calculated only for stoppages ending in the year, and is weighted by multiplying the duration of each stoppage by the workers involved.

NOTE: Because of rounding, sums of individual items may not equal totals.

¹ Stoppages extending across State lines have been counted separately in each State affected; workers involved and days idle were allocated among the States.

NOTE: Because of rounding, sums of individual items may not equal totals. Dashes (—) denote zeros.

^a Fewer than 50.

^b Idleness due to stoppage(s) beginning in prior year(s).

¹ The number of stoppages reported for a major industry group or division may not equal the sum of its components because individual stoppages occurring in two or more groups have been counted in each.

Workers involved and days idle have been allocated among the respective groups.

³ Idleness resulting from stoppage(s) beginning in prior year(s).

⁵ Includes other finished products made from fabrics and similar materials.

⁶ Fewer than 50.

⁷ Excludes ordnance, machinery, and transportation equipment.

¹ Includes professional, scientific, and controlling instruments; photographic and optical goods; watches and clocks.

⁷ The situations reported here have, for statistical purposes, been deemed to fall within the Bureau's definition of a work stoppage. This decision does not constitute a legal determination that a work stoppage has taken place in violation of any law or public policy.

NOTE: Because of rounding, sums of individual items may not equal totals. Dashes (-) denote zeros.

¹ Includes data for each metropolitan area in which 5 stoppages or more began in 1977. Some metropolitan areas include counties in more than one State, and hence, an area may equal or exceed the total for the State in which the major city is located. Stoppages in the logging and mining industries are excluded. Stoppages occurring in more than one metropolitan area are counted separately in each area affected; the workers involved and days idle are allocated to the respective areas.

² Included in the Chicago, Ill-Northwestern Indiana Standard Consolidated Area.

³ Included in the New York-Northeastern New Jersey Standard Consolidated Area.

⁴ Included in the New York City SMSA and New York-Northeastern New Jersey Standard Consolidated Area.

⁵ Includes Scranton and Wilkes-Barre-Hazleton.

NOTE: Because of rounding, sums of individual items may not equal totals.

Correction

Data on work stoppages in the New York-Northeastern New Jersey Standard Consolidated Area for the years 1974-76 were incorrect as published in table 24 of BLS Bulletins 1902 (data for 1974), 1940 (1975), and 1996 (1976). The correct figures are:

New York-Northeastern New Jersey Standard Consolidated Area¹

(Workers and days idle in thousands)

	Number of stoppages	Workers involved	Days idle
1974	358	107.2	1,606.1
1975	324	151.4	1,728.9
1976	353	161.5	2,246.1

¹ The Standard Consolidated Area consists of Nassau/Suffolk Counties, New York City, Westchester County, and Rockland County in New York; Jersey City, Newark, Paterson-Clifton-Passaic, and New Brunswick in New Jersey.

¹ Totals in this table differ from those in tables 1 and 2 and 6-24 because these stoppages ended during the year, and thus include idleness occurring in prior years.² The number of stoppages reported for a major industry group or division may not equal the sum of its components because individual stoppages occurring in two or more groups have been counted in each. Workers Involved and days idle have been allocated among the respective groups.³ Includes other finished products made from fabrics and similar materials.⁴ Excludes ordnance, machinery, and transportation equipment.⁵ Includes professional, scientific, and controlling instruments; photographic and optical goods; watches and clocks.⁶ The situations reported here have, for statistical purposes, been deemed to fall within the Bureau's definition of a work stoppage. This decision does not constitute a legal determination that a work stoppage has taken place in violation of any law or public policy.⁷ Fewer than 50.

¹ Totals in this table differ from those in tables 1 and 2 and 6-24 because these stoppages ended during the year, and thus include idleness occurring in prior years.

² The number of stoppages reported for a major industry group or division may not equal the sum of its components because individual stoppages occurring in two or more groups have been counted in each. Workers involved and days idle have been allocated among the respective groups.

³ Includes other finished products made from fabrics and similar materials.

⁴ Excludes ordinance, machinery, and transportation equipment.

⁵ Includes professional, scientific, and controlling instruments; photographic and optical

goods; watches and clocks.

⁶ The situations reported here have, for statistical purposes, been deemed to fall within the Bureau's definition of a work stoppage. This decision does not constitute a legal determination that a work stoppage has taken place in violation of any law or public policy.

⁷ Fewer than 50.

NOTE: Because of rounding, sums of individual items may not equal totals. Dashes (—) denote zeros.

¹ Less than 0.005 percent.

² Prior to 1958, miscellaneous plastics products were included under "Miscellaneous manufacturing industries."

³ Days idle in the primary metals industry group during the steel strike have been computed on the basis of average employment throughout the affected months, rather than on the usual basis of employment in the pay period ending nearest to the 15th of each month. If the percentage of time lost was calculated on the basis of the ratio of time lost to time worked plus time lost, it would have been 12.12 for the primary metal industry group.

⁴ Idleness as a percent of estimated working time does not include government workers.

⁵ Not available.

⁶ Data for 1950-58 include municipally operated utilities.

NOTE: The number of stoppages reported for a major industry group or division may not equal the sum of its components because individual stoppages occurring in 2 or more industry groups have been counted in each. The major industry group and division totals have been adjusted to eliminate duplication. Workers involved and days idle have been allocated among the respective industry groups.

Because of rounding, sums of individual items may not equal totals. Dashes denote zeros.

Appendix B. Scope, Definitions, and Methods

Scope

It is the purpose of this statistical series to report all work stoppages in the United States that involve six workers or more and continue for the equivalent of a full day or shift or longer.

Definitions

Strike or lockout. A strike is defined as a temporary stoppage of work by a group of employees (not necessarily members of a union) to express a grievance or enforce a demand. A lockout is a temporary withholding or denial of employment during a labor dispute to enforce terms of employment upon a group of employees. Because of the complexity of most labor-management disputes, the Bureau makes no attempt to distinguish between strikes and lockouts in its statistics; both types are included in the term "work stoppage" and are used interchangeably. The terms "dispute," "labor-management dispute," and "walkout" are also used interchangeably.

Workers and idleness. The figures on the number of "workers involved" and "days idle" include all workers made idle for one shift or longer in establishments directly involved in a stoppage. They do not account for secondary idleness—that is, the effects of a stoppage on other establishments or industries whose employees may be made idle as a result of material or service shortages.

The total number of workers involved in strikes in a given year may include double counting of individual workers if they were involved in more than one stoppage during that year. (Thus, in 1974, the Bureau recorded some 460,000 bituminous coal and lignite mining workers as participating in strikes, while 165,000 workers were employed in the industry.)

In some prolonged stoppages, the total days of idleness are estimated if the number of workers idle each day is not known. Significant changes in the number of workers idle are secured from the parties for use in computing days of idleness.

Methods

The relative measures. In computing the number of workers involved in strikes as a percent of total employment and

idleness as a percent of total working time, the following employment figures have been used:

From 1927 to 1950, all employed workers were included in the base, except those in occupations and professions in which little, if any, union organization existed or in which stoppages rarely, if ever, occurred. In most industries, all wage and salary workers were included in total employment except those in executive, managerial, or high supervisory positions, or those performing professional work the nature of which made union organization or group action unlikely. This measure of employment also excluded all self-employed persons; domestic workers; workers on farms employing fewer than six persons; all Federal and State government employees; and officials, both elected and appointed, in local government.

From 1951 to 1966, the Bureau's estimates of total employment in nonagricultural establishments, exclusive of government, were used as a base. Days of idleness computed on the basis of nonagricultural employment (exclusive of government) usually differed by less than one-tenth of a percentage point from that obtained by the former method, while the percentage of workers idle (compared with total employment) differed by about 0.5 of a point. For example, the percentage of workers idle during 1950 computed on the base used for the earlier years was 6.9, and the percentage for days of idleness was 0.44, compared with 6.3 and 0.40, respectively, computed on the new base.

From 1967 to 1973, two estimates of employment were used, one based on the wage and salary workers in the civilian work force, and the other on those in the private nonfarm sector.¹ The new private nonfarm series closely approximated the former BLS series which, as noted, excluded government and agricultural workers from employment totals, but accounted for idleness by such workers while on strike. The old method had resulted in an increasingly distorted measure of the severity of strikes; the likely growth of strike activity among government and farmworkers would have distorted the measure even more in the future. The "total economy" measure of strike idleness now included government and agricultural workers in its employment count as well as in the computation of idleness ratios, but excluded forestry, fishery, and private household workers from the base. To facilitate comparisons

¹ For further information see "Total Economy" Measure of Strike Idleness," *Monthly Labor Review*, October 1968, pp. 54-56.

Table B-1. Methods of computing relative measures of idleness

Component	Total economy measure	Nonagricultural sector measure	Private nonagricultural sector measure
Employment	Establishment series plus wage and salaried farm workers.	Establishment series.	Establishment series less government.
Estimated working time	Above employment times working days.	Above employment-times working days.	Above employment times working days.
Days of idleness as a percent of estimated total working time	$\frac{\text{Total idleness}}{\text{Above working time}} \times 100$	$\frac{\text{Total idleness less farm}}{\text{Above working time}} \times 100$	$\frac{\text{Total idleness less farm and government}}{\text{Above working time}} \times 100$

over time, the figure for the total economy had been carried back to 1939 (see table 1). The "private nonagricultural" measure excluded agricultural and government workers from employment totals and these groups were also removed from strike figures in arriving at a percentage of nonagricultural working time idle.

Beginning in 1974, government workers have been added to employment and idleness ratios. (See table 21.)

The differences in the various measures are illustrated in table B-1 in which the components of each measure and the methods of computation are set forth.

"Estimated working time" is computed by multiplying the average employment for the year by the number of days typically worked by most employed workers during that year. In these computations, Saturdays (when customarily not worked), Sundays, and established Federal holidays are excluded.²

Duration. Although only workdays are used in computing total days of idleness, duration is expressed in calendar days, including nonworkdays.

State data. Stoppages occurring in more than one State are listed separately in each State affected. The workers and days of idleness are allocated among each of the affected States.³ The procedures outlined in the section on relative measures also have been used in preparing estimates of idleness by State.

Metropolitan area data. Information is tabulated separately for the areas that currently comprise the list of Standard Metropolitan Statistical Areas (SMSA's) as defined by the Office of Management and Budget and, in addition, for a few communities historically included in the strike series before the current list of areas was compiled. Information is published only for those areas in which at least five stoppages were recorded during the year.

Some metropolitan areas include counties in more than one State, and hence, statistics for an area may occasionally equal or exceed totals for the State in which the major

city is located. Stoppages in the mining and logging industries are excluded from metropolitan area data but are reported by industry and State.

Unions involved. For this purpose, the union is the organization whose contract was involved or which has taken active leadership in the stoppage. Disputes involving more than one union are classified as jurisdictional or rival union disputes or as involving cooperating unions. If unorganized workers strike, a separate classification is used. However, the tabulations of "workers involved" include all who are made idle for one shift or longer in establishments directly involved in the dispute, including members of other unions and nonunion workers. Information is presented by major affiliation of the union, i.e., AFL-CIO, or, if there is no affiliation, by the designations "independent," "single firm," or "no union."

Sources of information

Occurrence of strikes. Information on the actual or probable existence of work stoppages is collected from a number of sources. Clippings on labor disputes are obtained from a comprehensive coverage of daily and weekly newspapers throughout the country. Information also is received regularly from the Federal Mediation and Conciliation Service. Other sources of information include State boards of mediation and arbitration; research divisions of State labor departments; local offices of State employment security agencies; and trade and union journals. Some employer associations, companies, and unions also furnish the Bureau with work stoppage information on a voluntary cooperative basis, either as stoppages occur or periodically.

² For example, the total economy figure for 1974 was computed by multiplying the average employment for the year by the number of working days ($79,683,000 \times 252 = 20,080,116,000$) and dividing this figure into the total number of days of idleness.

³ The same procedure is followed in allocating data on stoppages occurring in more than one industry, industry group, or metropolitan area.

Respondents to questionnaire. A questionnaire is mailed to each of the parties reported as involved in work stoppages to obtain information on the number of workers involved, duration, major issues, location, method of settlement, and other pertinent information.

Limitations of data. Although the Bureau seeks to obtain complete coverage, i.e., a "census" of all strikes involving six workers or more and lasting a full shift or more, information is undoubtedly missing on some strikes involv-

ing small numbers of workers. Presumably, these missing strikes do not substantially affect the number of workers and days of idleness reported.

To improve the completeness of the count of stoppages, the Bureau has constantly sought to develop new sources of information on the probable existence of stoppages. Over the years, these sources have probably increased the number of strikes recorded, but have had little effect on the number of workers or total idleness. As new agencies or organizations having knowledge of the existence of work stoppages are established or identified, every effort is made by the Bureau to establish cooperative arrangements.
